China 100W High Power Electromobile Wireless Charger ...

Underutilization isn't the only hurdle China's charging operators must overcome. As China promotes the use of distributed renewable power generation, and with solar power expected to become cheaper than coal power within the next five to 10 years, charging infrastructure needs to be built with the use of renewable energy in mind, according to Ouyang Mingguo, chairman of China EV100, an association of policymakers, academics, and electric vehicle industry participants.
