What is Motor Starter - Electronics Hub

Wouldnt crank a few times and tapping the starter with a hammer worked usually. Recently i had someone pull me to bump start it, i know for a fact i had enough momentum and still wouldnt go. Is there anything I should troubleshoot besides power to the starter and general wire condition? I dont know why it wouldnt fire with a manual push start. It depends on who you ask. A service manual, or factory service manual (FSM), is developed and published by the manufacture, and distributed to authorized dealerships so the mechanics could fix their own products.. Shop manuals are also referred to as factory service manuals because they are also developed and distributed to dealership mechanics.
