China is hot. The world sees a glorious future for this sleeping giant, three times larger than the United States, predicting it will blossom into the world's biggest economy by 2010. According to Chang, however, a Chinese-American lawyer and China specialist, the People's

Republic is a paper dragon. Peer beneath the veneer of modernization since Mao's death, and the symptoms of decay are everywhere: Deflation grips the economy, state-owned enterprises are failing, banks are hopelessly insolvent, foreign investment continues to decline, and Communist party corruption eats away at the fabric of society. Beijing's cautious reforms have left the country stuck midway between communism and capitalism, Chang writes. With its impending World Trade Organization membership, for the first time China will be forced to open itself to foreign competition, which will shake the country to its foundations. Economic failure will be followed by government collapse. Covering subjects from party politics to the Falun Gong to the government's insupportable position on Taiwan, Chang presents a thorough and very chilling overview of China's present and not-so-distant future.

Road traffic injuries are a neglected global pandemic. Up to 50 million people a year worldwide are injured or disabled in car accidents. The deleterious impact on the global economy is immense. Thousands of those injured die of opiate overdoses, trying to deal with chronic pain. The post-accident life of a survivor is all too often devastated by spinal or severe orthopedic injuries, depression, anxiety, PTSD, sleep disturbances, mild episodic or chronic pain, and/or a traumatic brain injury that can cause personality changes, cognitive and memory impairments, and debilitating fatigue. A substantially reduced quality of life with

career changes and setbacks, broken and overstressed relationships, and financial hardships that continue for many years, often ensue. First Responders, healthcare providers, the survivors' community and to the largest degree, the survivors' family, are forced to deal with the staggering impacts. Auto accidents can dramatically alter lives, forever. Where do survivors and their families go for help? How do survivors heal and get their lives back? Everyone is desperate for hope and evidence-based solutions to manage disabling conditions and ultimately reclaim their lives. This is the first book to offer comprehensive, evidence-based information to both the survivors and their caregivers on understanding, managing, and healing physical and emotional traumas sustained in auto accidents. Based on James Zender's more than fifteen years' experience as a clinical psychologist specializing in auto-accident trauma care, *Recovering From Your Car Accident* leads survivors and their families through the extensive process of emotional and physical recovery. With empathy and compassion, Dr. Zender explains how to conquer the multitude of challenges that often result from auto accidents, including managing pain, depression, and anxiety, addressing concerns about the future and finances, personality changes, emotional and cognitive dysfunction, post-traumatic stress, traumatic brain injury, and strained personal relationships. Through stories recounted by Dr. Zender's patients,

survivors will learn that they are not alone and that there is hope for a better tomorrow. Policymakers will gain insight into accident prevention and will be inspired to implement policy improvements to better meet the needs of the auto accident community. Helpful tips throughout this book and a resource section featuring the best online and community support options will aid survivors and their families with rehabilitation. Recovering from Your Car Accident will assist survivors with rebuilding their lives and discovering new ways to thrive.

Your practical guide to thriving in a bear market. Massive NYT Best-Seller. A quarter of a million people have read Conquer the Crash so far, which recommended safety in the early years of what turned out to be the worst decade for stocks on record. The 2020 edition recognizes the same type of warning signs in place as before, but bigger. Learn practical steps now for achieving maximum financial safety and for taking maximum advantage of unique bear market opportunities.

Today's financial and economic tribulations were a long time in the making. Many people ask, "Why didn't someone see it coming?" A New York Times bestselling book did see it coming. Over 100,000 people read it in time to protect their wealth. The book foresaw and explained the collapse in home prices, plunge in stocks, subprime debacle, liquidity crisis, the demise of Fannie and Freddie, the

Federal Reserve's failure to turn the trend, and lots more. The book was Robert Prechter's *Conquer the Crash*, published in early 2002, when the Dow was above 10,000 and the financial world was partying around-the-clock. Fast forward to today: the average U.S. homeowner has suffered a decline of 30% to 40% in property value. Stocks and commodities had their biggest fall since 1929-1932. Fannie Mae is a zombie corporation under the government's protection. The Fed has pushed every button at its disposal (and then some), to no avail. If Prechter thought a whole new book would help, he'd have written one. But *Conquer the Crash* is a book-length forecast that's still coming true -- only some of the future has caught up with the specific predictions he published back then. There is much more to come. That means more danger, but also great opportunity. *Conquer the Crash*, 2nd edition offers you 188 new pages of vital information (480 pages total) plus all the original forecasts and recommendations that make the book more compelling and relevant than the day it published. In every disaster, only a very few people prepare themselves beforehand. Think about investor enthusiasm in 2005-2008, and you'll realize it's true. Even fewer people will be ready for the soon-approaching, next leg down of the unfolding depression. In this 2nd edition, Prechter gives a warning he's never had to include in 30 years of publishing -- namely, that the doors to financial safety are

closing all over the world. In other words, prudent people need to act while they can. Conquer the Crash, 2nd Edition readers will receive exclusive online access to the Conquer the Crash Readers Page, where Prechter continually updates the book's recommended services and institutions.

Sixteen minutes later, the unthinkable happens: the plane plunges into the ocean. The only survivors are Scott Burroughs--the painter--and a four year old boy, who is now the last remaining member of an immensely wealthy and powerful media mogul's family. With chapters weaving between the aftermath of the crash and the backstories of the passengers and crew members--including a Wall Street titan and his wife, a Texan born party boy just in from London, a young woman questioning her path in life, and a career pilot--the mystery surrounding the tragedy heightens. As the passengers' intrigues unravel, odd coincidences point to a conspiracy. Was it merely by dumb chance that so many influential people perished? Or was something far more sinister at work? Events soon threaten to spiral out of control in an escalating storm of media outrage and accusations. And while Scott struggles to cope with fame that borders on notoriety, the authorities scramble to salvage the truth from the wreckage. Amid pulse quickening suspense, the fragile relationship

between Scott and the young boy glows at the heart of this stunning novel, raising questions of fate, human nature, and the inextricable ties that bind us together.

The author of the bestselling You Are Not So Smart shares more discoveries about self-delusion and irrational thinking, and gives readers a fighting chance at outsmarting their not-so-smart brains David McRaney 's first book, You Are Not So Smart, evolved from his wildly popular blog of the same name. A mix of popular

psychology and trivia, McRaney ' s insights have struck a chord with thousands, and his blog--and now podcasts and videos--have become an Internet phenomenon. Like You Are Not So Smart, You Are Now Less Dumb is grounded in the idea that we all believe ourselves to be objective observers of reality--except we ' re not. But that ' s okay, because our delusions keep us sane. Expanding on this premise, McRaney provides eye-opening analyses of fifteen more ways we fool ourselves every day, including: The Misattribution of Arousal (Environmental factors have a greater affect on our emotional arousal than the person right in front of us) Sunk Cost Fallacy (We will engage in something we don ' t enjoy just to make the time or money already invested " worth it ") Deindividuation (Despite our best intentions, we practically disappear when subsumed by a mob mentality) McRaney also reveals the true price of happiness, why Benjamin Franklin was such a badass, and how to avoid falling for our own lies. This smart and highly entertaining book will be wowing readers for years to come.

Nuclear Weapons, the Damascus Accident, and the Illusion of Safety

The Oscar-shortlisted documentary Command and Control, directed by Robert Kenner, finds its

origins in Eric Schlosser's book and continues to explore the little-known history of the management and safety concerns of America's nuclear arsenal. "A devastatingly lucid and detailed new history of nuclear weapons in the U.S. Fascinating." —Lev Grossman, *TIME Magazine* "Perilous and gripping . . . Schlosser skillfully weaves together an engrossing account of both the science and the politics of nuclear weapons safety." —*San Francisco Chronicle* A myth-shattering exposé of America's nuclear weapons Famed investigative journalist Eric Schlosser digs deep to uncover secrets about the management of America's nuclear arsenal. A groundbreaking account of accidents, near misses, extraordinary heroism, and technological breakthroughs, *Command and Control* explores the dilemma that has existed since the dawn of the nuclear age: How do you deploy weapons of mass destruction without being destroyed by them? That question has never been resolved—and Schlosser reveals how the combination of human fallibility and technological complexity still poses a grave risk to mankind. While the harms of global warming increasingly dominate the news, the equally dangerous yet more immediate threat of nuclear weapons has been largely forgotten. Written with the vibrancy of a first-rate thriller, *Command and Control* interweaves the minute-by-minute story of an accident at a nuclear missile silo in rural Arkansas with a historical narrative that spans more than fifty years. It depicts the urgent effort by American scientists, policy makers, and military officers to ensure that nuclear weapons can't be stolen, sabotaged, used without permission, or detonated inadvertently. Schlosser also looks at the Cold War from a new perspective, offering history from the ground up, telling the stories of bomber pilots, missile commanders, maintenance

crews, and other ordinary servicemen who risked their lives to avert a nuclear holocaust. At the heart of the book lies the struggle, amid the rolling hills and small farms of Damascus, Arkansas, to prevent the explosion of a ballistic missile carrying the most powerful nuclear warhead ever built by the United States. Drawing on recently declassified documents and interviews with people who designed and routinely handled nuclear weapons, *Command and Control* takes readers into a terrifying but fascinating world that, until now, has been largely hidden from view. Through the details of a single accident, Schlosser illustrates how an unlikely event can become unavoidable, how small risks can have terrible consequences, and how the most brilliant minds in the nation can only provide us with an illusion of control. Audacious, gripping, and unforgettable, *Command and Control* is a tour de force of investigative journalism, an eye-opening look at the dangers of America's nuclear age.

The Golden Age of Aviation is brought to life in this story of the giant Zeppelin airships that once roamed the sky—a story that ended with the fiery destruction of the Hindenburg. “Genius . . . a definitive tale of an incredible time when mere mortals learned to fly.”—Keith O'Brien, *The New York Times* At the dawn of the twentieth century, when human flight was still considered an impossibility, Germany's Count Ferdinand von Zeppelin vied with the Wright Brothers to build the world's first successful flying machine. As the Wrights labored to invent the airplane, Zeppelin fathered the remarkable airship, sparking a bitter rivalry between the two types of aircraft and their innovators that would last for decades, in the quest to control one of humanity's most inspiring achievements. And it was the airship—not the airplane—that led the

way. In the glittery 1920s, the count's brilliant protégé, Hugo Eckener, achieved undreamed-of feats of daring and skill, including the extraordinary Round-the-World voyage of the Graf Zeppelin. At a time when America's airplanes—rickety deathtraps held together by glue, screws, and luck—could barely make it from New York to Washington, D.C., Eckener's airships serenely traversed oceans without a single crash, fatality, or injury. What Charles Lindbergh almost died doing—crossing the Atlantic in 1927—Eckener had effortlessly accomplished three years before the Spirit of St. Louis even took off. Even as the Nazis sought to exploit Zeppelins for their own nefarious purposes, Eckener built his masterwork, the behemoth Hindenburg—a marvel of design and engineering. Determined to forge an airline empire under the new flagship, Eckener met his match in Juan Trippe, the ruthlessly ambitious king of Pan American Airways, who believed his fleet of next-generation planes would vanquish Eckener's coming airship armada. It was a fight only one man—and one technology—could win. Countering each other's moves on the global chessboard, each seeking to wrest the advantage from his rival, the struggle for mastery of the air was a clash not only of technologies but of business, diplomacy, politics, personalities, and the two men's vastly different dreams of the future. *Empires of the Sky* is the sweeping, untold tale of the duel that transfixed the world and helped create our modern age. The bestselling author of *Undoing Depression* offers a brain-based guide to permanently ending bad habits. Richard O'Connor's bestselling book *Undoing Depression* has become a touchstone in the field, helping thousands of therapists and patients overcome depressive patterns. In *Rewire*, O'Connor expands those ideas, showing how we actually have two brains—a conscious

deliberate self and an automatic self that makes most of our decisions—and how we can train the latter to ignore distractions, withstand temptations, and interrupt reflexive, self-sabotaging responses. *Rewire* gives readers a road–map to overcoming the most common self-destructive habits, including procrastination, excessive worrying, internet addiction, overeating, risk-taking, and self-medication, among others. By learning valuable skills and habits—including mindfulness, self-control, confronting fear, and freeing yourself from mindless guilt—we can open ourselves to vastly more successful, productive, and happy lives.

“Pollan shines a light on our own nature as well as on our implication in the natural world.” —The New York Times “A wry, informed pastoral.” —The New Yorker The book that helped make Michael Pollan, the New York Times bestselling author of *How to Change Your Mind*, *Cooked* and *The Omnivore’s Dilemma*, one of the most trusted food experts in America Every schoolchild learns about the mutually beneficial dance of honeybees and flowers: The bee collects nectar and pollen to make honey and, in the process, spreads the flowers’ genes far and wide. In *The Botany of Desire*, Michael Pollan ingeniously demonstrates how people and domesticated plants have formed a similarly reciprocal relationship. He masterfully links four fundamental human desires—sweetness, beauty, intoxication, and control—with the plants that satisfy them: the apple, the tulip, marijuana, and the potato. In telling the stories of four familiar species, Pollan illustrates how the plants have evolved to satisfy humankind’s most basic yearnings. And just as we’ve benefited from these plants, we have also done well by them. So who is really domesticating whom?

AWARD • One of today's most insightful and influential thinkers offers a powerful exploration of inequality and the lesson that generations of Americans have failed to learn: Racism has a cost for everyone—not just for people of color. WINNER OF THE PORCHLIGHT BUSINESS BOOK AWARD • ONE OF THE BEST BOOKS OF THE YEAR: Time, The Washington Post, St. Louis Post-Dispatch, Ms. magazine, BookRiot, Library Journal “This is the book I’ve been waiting for.”—Ibram X. Kendi, #1 New York Times bestselling author of *How to Be an Antiracist* Look for the author’s new podcast, *The Sum of Us*, based on this book! Heather McGhee’s specialty is the American economy—and the mystery of why it so often fails the American public. From the financial crisis of 2008 to rising student debt to collapsing public infrastructure, she found a root problem: racism in our politics and policymaking. But not just in the most obvious indignities for people of color. Racism has costs for white people, too. It is the common denominator of our most vexing public problems, the core dysfunction of our

democracy and constitutive of the spiritual and moral crises that grip us all. But how did this happen? And is there a way out? McGhee embarks on a deeply personal journey across the country from Maine to Mississippi to California, tallying what we lose when we buy into the zero-sum paradigm—the idea that progress for some of us must come at the expense of others. Along the way, she meets white people who confide in her about losing their homes, their dreams, and their shot at better jobs to the toxic mix of American racism and greed. This is the story of how public goods in this country—from parks and pools to functioning schools—have become private luxuries; of how unions collapsed, wages stagnated, and inequality increased; and of how this country, unique among the world’s advanced economies, has thwarted universal healthcare. But in unlikely places of worship and work, McGhee finds proof of what she calls the Solidarity Dividend: the benefits we gain when people come together across race to accomplish what we simply can’t do on our own. *The Sum of Us* is not only a brilliant analysis of how we arrived here but also a heartfelt message, delivered with startling empathy, from a black woman to a multiracial America. It leaves us with a new vision for a future in which we finally realize that life can be more than a zero-sum game. **LONGLISTED FOR THE ANDREW CARNEGIE MEDAL**

You've heard the stories about the dark side of the internet--hackers, #gamergate, anonymous mobs attacking an unlucky victim, and revenge porn--but they remain just that: stories. Surely these things would never happen to you. Zoe Quinn used to feel the same way. She is a video game developer whose ex-boyfriend published a crazed blog post cobbled together from private

information, half-truths, and outright fictions, along with a rallying cry to the online hordes to go after her. They answered in the form of a so-called movement known as #gamergate--they hacked her accounts; stole nude photos of her; harassed her family, friends, and colleagues; and threatened to rape and murder her. But instead of shrinking into silence as the online mobs wanted her to, she raised her voice and spoke out against this vicious online culture and for making the internet a safer place for everyone. In the years since #gamergate, Quinn has helped thousands of people with her advocacy and online-abuse crisis resource Crash Override Network. From locking down victims' personal accounts to working with tech companies and lawmakers to inform policy, she has firsthand knowledge about every angle of online abuse, what powerful institutions are (and aren't) doing about it, and how we can protect our digital spaces and selves. Crash Override offers an up-close look inside the controversy, threats, and social and cultural battles that started in the far corners of the internet and have since permeated our online lives. Through her story--as target and as activist--Quinn provides a human look at the ways the internet impacts our lives and culture, along with practical advice for keeping yourself and others safe online.

Why do trends in human society sometimes change so suddenly?The past three years show how quickly cultural shifts can occur, which makes answering the question above all the more urgent. In 1999, we were celebrating our heroes, the stock market had reached unprecedented heights - and many people believed that peace in the Middle East was at hand.Three years later, the economy is weak, corporate executives are being thrown in jail, bloodletting between Israelis

and Palestinians is daily ritual, India is testing missiles, North Korea is threatening the U.S. with nuclear destruction, the U.S. is at war with Iraq, European allies are deserting the U.S., a senator is calling for the resignation of the chairman of the Federal Reserve, and Americans are stocking supplies for terrorist attacks. What changed? And why? Is it possible that all of these events flow from the same cause? Best-selling author Robert Prechter's new two-book set, *Socionomics: The Science of History and Social Prediction*, proposes a startlingly fresh answer. In *Socionomics: The Science of History and Social Prediction*, Robert Prechter spells a historical correlation between patterned shifts in social mood and their most sensitive register, the stock market. He also presents engaging studies correlating social mood trends to music, sports, corporate culture, peace, war and macroeconomic trends. The new science of socionomics takes hundreds of popular notions about mass psychology, culture and the stock market and stands them on their heads. *Socionomics: The Science of History and Social Prediction* includes a 2nd edition of the book that started it all, *The Wave Principle of Human Social Behavior* and the *New Science of Socionomics* as well as his new title, *Pioneering Studies in Socionomics*, an accessible collection of the essays that founded a new basis for social science. “In climbing the Seven Summits, Silvia Vasquez-Lavado did nothing less than take back her own life—one brave step at a time. She will inspire untold numbers of souls with this story, for her victory is a win on behalf of all of us.”—Elizabeth Gilbert *Endless ice. Thin air. The threat of dropping into nothingness thousands of feet below. This is the climb Silvia Vasquez-Lavado braves in her page-turning, pulse-raising memoir chronicling her journey to Mount Everest. A Latina hero in the elite macho tech world of Silicon Valley, privately, she was hanging by a thread. Deep in the throes of alcoholism, hiding her*

sexuality from her family, and repressing the abuse she'd suffered as a child, she started climbing. Something about the brute force required for the ascent—the risk and spirit and sheer size of the mountains and death's close proximity—woke her up. She then took her biggest pain as a survivor to the biggest mountain: Everest. “The Mother of the World,” as it's known in Nepal, allows few to reach her summit, but Silvia didn't go alone. She gathered a group of young female survivors and led them to base camp alongside her. It was never easy. At times hair-raising, nerve-racking, and always challenging, Silvia remembers the acute anxiety of leading a group of novice climbers to Everest's base, all the while coping with her own nerves of summiting. But, there were also moments of peace, joy, and healing with the strength of her fellow survivors and community propelling her forward. *In the Shadow of the Mountain* is a remarkable story of heroism, one which awakens in all of us a lust for adventure, an appetite for risk, and faith in our own resilience.

There is much more to come, which is why it remains your best resource for practical "How To," "What To" and "Should You" advice to help you survive and prosper in this long-term bear market. If you own an earlier edition, you already know it was a financial lifesaver in 2002 and 2007. Yet as 2014-2015 unfold, the third edition will prove itself the most imperative of all. No investment volume can match the fearless candor of Prechter's analysis regarding the months and years ahead. You can (and should) get your hands on Conquer the Crash immediately. As Bob explains in the book, bear markets are much shorter affairs than bull markets. They bring the kind of destruction that can ruin anyone who ignores the warning signs. It can take decades not years to recoup losses. It's more important than ever to take action now.

Captain Bunn founded SOAR to develop effective methods for dealing with flight anxiety. Therapists who have found this phobia difficult to treat will find everything they need to give their clients success. Anxious flyers who have “tried everything” to no avail can look forward to joining the nearly 10,000 graduates of the SOAR program who now have the whole world open to them as they fly anxiety free wherever they want. This approach begins by explaining how anxiety, claustrophobia, and panic are caused when noises, motions—or even the thought of flying—trigger excessive stress hormones. Then, to stop this problem, Captain Bunn takes the reader step-by-step through exercises that permanently and automatically control these feelings. He also explains how flying works, why it is safe, and teaches flyers how to strategically plan their flight, choose the right airlines, meet the captain, and so on. Through this program, Captain Bunn has helped thousands overcome their fear of flying. Now his book

arms readers with the information they need to control their anxiety and fly comfortably. Top economist Gary Shilling shows you how to prosper in the slow-growing and deflationary times that lie ahead. While many investors fear a rapid rise in inflation, author Gary Shilling, an award-winning economic forecaster, argues that the global economy is going through a long period of de-leveraging and weak growth, which makes deflation far more likely and a far greater threat to investors than inflation. Shilling explains in clear language and compelling logic why the world economy will struggle for several more years and what investors can do to protect and grow their wealth in the difficult times ahead. The investment strategies that worked for last 25 years will not work in the next 10 years. Shilling advises readers to avoid broad exposure to stocks, real estate, and commodities and to focus on high-quality bonds, high-dividend stocks, and consumer staple and food stocks. Written by one of today's best forecasters of economic trends—twice voted by Institutional Investor as Wall Street's top economist—Clearly explains what to invest in, what to avoid, and how to cope with a deflationary, slow-growth economy. Demonstrates how Shilling has been consistently right about major economic trends since he began forecasting in the early 1980s. Filled with in-depth insights and practical advice, this timely guide lays out a convincing case for why investors need to be prepared for a long period of weak growth and deflation—not inflation—and what you can do to prosper in the difficult times ahead. Economists have long insisted the market is "efficient" and "random," with little to no relationship between one move and the next. This view suggests we can learn nothing from studying the stock market's past, and that its turning levels are impossible to anticipate. Robert Prechter challenges this view and more in his book, *Beautiful Pictures from the Gallery of Phinance*. Chart after chart displays price and time relationships that adhere to ratios attaching to a series of numbers called the Fibonacci sequence. The vast web of market similarities Prechter reveals in *Beautiful Pictures* presents the

opportunity to understand the mathematical basis of social mood, which regulates stock price averages. The final pages record an application of the idea to real-time market forecasting. Take advantage of that opportunity and discover a whole new market perspective.

A passionate tale of love, freedom, and conquest from the New York Times bestselling author of *The House of the Spirits*, Isabel Allende. Born into a poor family in Spain, Inés Suárez, finds herself condemned to a life of poverty without opportunity as a lowly seamstress. But it's the sixteenth century, the beginning of the Spanish conquest of the Americas. Struck by the same restless hope and opportunism, Inés uses her shiftless husband's disappearance to Peru as an excuse to embark on her own adventure. After learning of her husband's death in battle, she meets the fiery war hero, Pedro de Valdivia and begins a love that not only changes her life but the course of history. Based on the real historical events that founded Chile, Allende takes us on a whirlwind adventure of love and loss seen through the eyes of a daring, complicated woman who fought for freedom.

National Bestseller * New York Times Editors' Choice * Financial Times "Books to Read in 2022" "A gripping account of PayPal's origins and a vivid portrait of the geeks and contrarians who made its meteoric rise possible" (*The Wall Street Journal*)—including Elon Musk, Amy

Rowe Klement, Peter Thiel, Julie Anderson, Max Levchin, Reid Hoffman, and many others whose stories have never been shared. Today, PayPal's founders and earliest employees are considered the technology industry's most powerful network. Since leaving PayPal, they have formed, funded, and advised the leading companies of our era, including Tesla, Facebook, YouTube, SpaceX, Yelp, Palantir, and LinkedIn, among many others. As a group, they have driven twenty-first-century innovation and entrepreneurship. Their names stir passions; they're as controversial as they are admired. Yet for all their influence, the story of where they first started has gone largely untold. Before igniting the commercial space race or jumpstarting social media's rise, they were the unknown creators of a scrappy online payments start-up called PayPal. In building what became one of the world's foremost companies, they faced bruising competition, internal strife, the emergence of widespread online fraud, and the devastating dot-com bust of the 2000s. Their success was anything but certain. In *The Founders: The Story of PayPal and the Entrepreneurs Who Shaped Silicon Valley*, award-winning author and biographer Jimmy Soni explores PayPal's turbulent early days. With hundreds of interviews and unprecedented access to thousands of pages of internal material, he shows how the seeds of so much of what shapes our world today—fast-scaling digital start-ups, cashless currency concepts, mobile money transfer—were planted two decades ago. He also reveals the stories of countless individuals who were left out of the front-page features and banner headlines but who were central to PayPal's success. Described as “an intensely magnetic chronicle” (*The New York Times*) and “engrossing” (*Business Insider*), *The Founders* is a story of iteration and

inventiveness—the products of which have cast a long and powerful shadow over modern life. This narrative illustrates how this rare assemblage of talent came to work together and how their collaboration changed our world forever.

In this runaway New York Times bestseller, a harrowing near-death experience brings together an English teacher and her student as they struggle to survive on a desert island. Sixteen-year-

old T.J. Callahan has no desire to go anywhere. With his cancer in remission, all he wants is to get back to his normal life. But his parents insist that he spend the summer catching up on the school he missed while he was sick. Anna Emerson is a thirty-year-old English teacher who has been worn down by the cold Chicago winters and a relationship that's going nowhere. To break up the monotony of everyday life, she jumps at the chance to spend the summer on a tropical island tutoring T.J. Anna and T.J. board a private plane headed to the Callahans' summer home, but as they fly over the Maldives' twelve hundred islands, the unthinkable happens: their plane crashes in shark-infested waters. They make it to shore, but soon discover they're stranded on an uninhabited island. At first, their only thought is survival. But as the days turn to weeks, and then months, and as birthdays pass, the castaways must brave violent tropical storms, the many dangers lurking in the sea, and the worst threat of all—the possibility that T.J.'s cancer could return. With only each other for love and support, these two lost souls must come to terms with their situation and find companionship in one another in the moments they need it most.
