Spirit vs. Ego: 9 Key  
Insights Which Will

The ego has an  
agenda that is mostly  
at odds with our soul.

The soul wants our  
whole being in union  
with God because in

*Page 6/106*

that union, it knows that it is fulfilling our personal, Divine Purpose as a human being while alive here on Earth. That love connection with God needs to be in place, knows the soul and then everything else will flow.

It is ego that travels to the highest mountain

peaks, thinking that Spirit can be contacted there. ego is that element of Soul that most desires union with the transcendent God. In this way, a healthy ego can be a bridge between Spirit and Soul. An overemphasis on Spirit, however,

*Page 8/106*

produces an  
overinflated ego,  
which, as we know, is  
big trouble.

The ego is a fiction  
created in the mind,

Thoughts and beliefs  
about who see

from the Truth, they

are merely ideas of who we think we are, conceptualized versions of who and what we imagine ourselves to be, and most people believe their minds, or the image that they have of themselves.

attachment has full control over that person ' s

soul / consciousness, ego and emotions.

This is because these attachments have already been deeply programmed in the astral heavens before being sent down as

parasites to infect humans.

## Higher Consciousness – The Soul and the Spirit

From an evolutionary perspective, ego perception is formed by a limited and fragmented view of what Life is and how it unfolds. It rises when

*Page 32/106*

we ignore our  
underlying wholeness.  
Accordingly, ego is a  
false and  
manufactured state of  
consciousness in us  
that only perceives  
reality from one  
particular point of  
view.

The ego has an

agenda that is mostly at odds with our soul. The soul wants our whole being in union with God because in that union, it knows that it is fulfilling our personal, Divine Purpose as a human being while alive here on Earth. That love connection with God needs to

There are three  
parts to the spirit of  
the human  
consciousness,  
these are: the ego,  
the psyche and the  
soul. The human  
consciousness is  
encapsulated within

the human body, the state of the human body depends entirely on the human consciousness that resides within the body and radiates outwards.

The Unfortunate

The ego is the part  
of the soul that  
believes in  
separation from  
God. It naturally  
identifies with those  
aspects of self that  
seem to be  
separate; i.e., the

Thoughts and

The ego is your  
body-mind self, or  
your false self. The  
ego is founded on

identification with your body and mind at the object-pole of attention. The ego exercises IQ and EQ but has no access to SQ. Soul. The soul is your existential self, or your true self. The soul is founded on identification with feeling-awareness itself (or

subject-pole of
