Contouring involves the use of highlighter and bronzer to define, enhance and sculpt the structure of the face. If you've seen the images of women with different stripes or dots across their faces (as above) – this is contouring. The idea is to highlight areas such as under the eye and create shadows for extra definition.

~~A beginner's guide to contouring | Life | Yours~~

Contouring allows a three dimensional view in two dimensions and is a fundamental technique to represent spatial data. All aspects of this type of representation are covered including data preparation, selecting contour intervals, interpolation and gridding, computing volumes and output and display.
