Convolutional Sequence to Sequence
Learning Posted on October 13, 2018

My last article revolved around the so-called Transformer, an innovative new architecture that is particularly suited for sequence-to-sequence learning tasks such as machine translation.

This video is about Convolutional Sequence to Sequence. It explains the model structure in detail, how it is

trained, and how it generates sequences. I made this video because some of you PM me about the detail of Conv Seq2Seq, and I was struggling understanding this paper while preparing for the last video, "ACL 2018 | Paper Review: Hierarchical ...

Convolutional Sequence To Sequence Learning

Convolutional Sequence to Sequence Learning. Abstract: The prevalent approach to sequence to sequence learning maps an input sequence to a variable length output sequence via recurrent neural networks. We introduce an architecture based entirely on convolutional neural networks. Compared to recurrent models, computations over all elements can be...
