From the cofounder of the revolutionary brand Bulletin, a business book that demystifies the world of entrepreneurship in real-time, from the trenches filled with heart and humor, How to Build a Goddamn Empire shares the real-world, hard-earned business wisdom of one female entrepreneur who transformed an idea into a massive, category-disrupting national brand. As a first-time and inexperienced founder, Ali Kriegsman felt like she couldn't relate to the glossy, glamorous entrepreneurs crowding her Instagram feed. In reality, Kriegsman learned, building something from nothing is a daily fight with your impostor syndrome, a crash course in venture-capitalist speak, and, as she learned in 2020, a constant battle to weather the storm of an ever-changing marketplace. While in the thick of scaling her business, making a stressful pivot, and managing a team of employees through an unprecedented global pandemic, Kriegsman decided to write about her experience, in the hopes that it will act as a guidepost to future founders. With chapters ranging from "The Business You Start Isn't the Business You'll Run" to "Press? Success," Ali Kriegsman demystifies the world of entrepreneurship in real time, from the trenches. In "Hard Decisions" Kriegsman shares her experiences of managing the company through the COVID-19 crisis with heart and searing honesty. How to Build a Goddamn Empire also features words of wisdom from some of Kriegsman's fellow female founders who have built successful companies of radically different stages and sizes. By using the questions she's most frequently asked as her blueprint, Kriegsman offers candid insights into the nuts and bolts of building a brand from scratch-discussing early failures, picking the right cofounder, securing press, finding funding, and even staying afloat during a crisis-to give women the tools that will help take their ideas to the next level.

The market for Islam-compliant products is getting more and more important, due to the high impact of religious obligation on Muslim consumer behaviour. According to studies, the market for Muslim-compliant brands has increased dramatically, with a global worth of \$1.5 trillion a year. However, the market for Islam-compliant brands seems to be underdeveloped in Europe when compared to the rest of the world. Surprisingly, little research is conducted in this highly attractive segment, although Islam is assumed to be the fastest growing religion, with a total of 1.6 billion followers. Furthermore, especially young Muslim consumers constantly demand brands which enable an Islamic lifestyle. When creating brands, the concept of brand identity is highly important as it provides brand uniqueness and the main idea of what a brand stands for. Furthermore, this concept is a fundament for making target-group-specific decisions in brand management. The central question within this study concerns the fact that within the global environment, Muslims especially in non-Muslim countries do not know whether a brand is compliant with Islamic standards and can thus be consumed. This study contributes to close the gap in this segment by identifying several brand identity factors which can help to create an Islam-compliant brand identity. A model is created which helps to manage brand identity in order to attract Muslim consumers. Furthermore, it allows balancing each brand identity according to the needs of a target group and, consequently, enables Muslim consumers to identify a brand as Islam-compliant.

What's a brand name worth that clearly projects a positive identity? A premium price, of course. What are the best techniques to create a brand name and marketing strategy? The author of this book, founder of one of the world's top marketing and advertising firms, The Martin Agency, is an expert at branding strategy who reveals the techniques he uses. Martin explains how to cut through the mumbo jumbo so that what a company or product stands for can be expressed NOT just in a paragraph, NOT just in a sentence, but in a single word. THAT'S what creates a powerful brand. For example, Volvo has come to stand for "Safety." At Perdue, "Freshness" is synonymous with quality. These are only two of many examples showing how a focused identity can become an unassailable advantage. In case after case, the reader is taken behind the scenes to join in a fascinating search for identity. On practically every page, the reader will find a usable technique for developing high impact marketing and branding strategy.

Building Better Brands is the essential guide to creating and evolving brands. Leveraging three decades of brand consulting for legendary companies like Caterpillar, Harley-Davidson, 3M, Owens-Illinois, National Australia Bank, and American Express, as well as middle-market and new-media startups, Scott Lerman shares the processes and frameworks needed to build great brands. This book is for you if you're a CEO seeking to enhance your knowledge of the branding process, a marketing/communications specialist who wants to take a leadership role in advancing an organizations brand, a brand consultant who is striving to sharpen and extend your skills, or a student who wants to jump-start a career in branding. The world's leading practitioner of branding predicts the future of companies' identities in an ever-changing marketing landscape. What is the future for brands and branding? Does globalization mean that variety and individuality will be crushed out of existence by massive multinationals? Will everywhere and everything become similar, like the world of airports today? Or will there still be room for brands that thrive on being different? What about the impact of digital technology and increasing customer feedback through the internet and social media? What, in fact, do customers want? Today's businesses, in addition to thinking about price and authenticity, have to deal with corporate social responsibility. How does this affect the products and services we consume? How does it influence the way we feel about organizations? Are corporations here to maximize profits and grow, or to help society, or both? With the rapid rise of new markets in India, China, Brazil, and elsewhere, will new global brands emerge based around local cultural strengths and heritage? If so, what will this mean for the traditional dominance of brands based on Western cultural norms? Wally Olins's fascinating book looks at every aspect of the world of branding. With his customary flair and no-nonsense prose, he analyzes the problems facing today's organizations, criticizes corporate missteps, praises those companies who seem to be building and sustaining brands efficiently in our brave new world, and predicts the future of branding. No one interested in marketing, business, or contemporary culture will want to be without this book.

Marketers and business owners struggle to effectively connect with their customers, costing them and their companies millions in lost revenue. In a world filled with constant, on-demand distractions, it has become near-impossible for business owners to effectively cut through the noise to reach their customers, something Donald Miller knows first-hand. In this book, he shares the proven system he has created to help you engage and truly influence customers.
