

## Creating Life Like Animals In Polymer Clay

**#1 New York Times bestseller and USA Today bestseller** The more we know about the animals in our world and the better we care for them, the better our lives will be. Former veterinary technician and animal advocate Tracey Stewart understands this better than most—and she’ s on a mission to change how we interact with animals. Through hundreds of charming illustrations, a few homemade projects, and her humorous, knowledgeable voice, Stewart provides insight into the secret lives of animals and the kindest ways to live with and alongside them. At home, she shows readers how to speak “ dog-ese ” and “ cat-ese ” and how to “ virtually adopt ” an animal. In the backyard, we learn about building bee houses, dealing nicely with pesky moles, and creative ways to bird-watch. And on the farm, Stewart teaches us what we can do to help all farm animals lead a better life (and reveals pigs’ superpowers!). Part practical guide, part memoir of her life with animals, and part testament to the power of giving back, *Do Unto Animals* is a gift for animal lovers of all stripes.

The Complete Beginner’s Guide to Drawing Animals features dozens of comprehensive drawing lessons designed to teach aspiring artists how to draw a variety of animals, from lifelike pet portraits to zoo and safari animals.

Argues for the replacement of traditional ideas of human superiority with a more enlightened ethic regarding the value of non-human life, and discusses suicide, euthanasia, and animal rights.

In a world where we usually measure animals by human standards, prize-winning author and MacArthur Fellow Carl Safina takes us inside their lives and minds, witnessing their profound capacity for perception, thought and emotion, showing why the word “ it ” is often inappropriate as we discover who they really are. Weaving decades of observations of actual families of free-living creatures with new discoveries about brain functioning, Carl Safina’s narrative breaches many commonly held boundaries between humans and other animals. In*Beyond Words*, readers travel the wilds of Africa to visit some of the last great elephant gatherings, then follow wolves of Yellowstone National Park sort out the aftermath of their personal tragedy, then plunge into the astonishingly peaceful society of killer whales living in waters of the Pacific Northwest. We spend quality time, too, with dogs and falcons and ravens; and consider how the human mind originated. In his wise and passionate new book, Safina delivers a graceful examination of how animals truly think and feel, which calls to question what really does—and what should—make us human.

Around the world, city highways and country roads have cut through natural spaces. Wild animals are blocked from the resources they need to survive, or must make dangerous crossings across busy roads to get to them. Fortunately, solving this problem has inspired some creative solutions! Take a tour of wildlife crossings across the globe, from grassy badger bridges to underpasses for elephants. Discover how these inventive pathways have saved both animal and human lives and helped preserve ecosystems.

Young at art Combine the familiar charm of crayons with “grown-up” art techniques for surprisingly realistic results! Your old childhood coloring friends are all grown up! In this unique book, best-selling artist Lee Hammond proves that crayons are not just for kids anymore but can hold their own as a “serious” (if unexpected) art medium. Use Hammond’s easy methods to create striking drawings that feature brilliant color and incredibly lifelike texture. • 29 step-by-step demonstrations cover a wide range of subjects—still life, landscapes, animals and people • Simple blending, layering and burnishing techniques translate into remarkably realistic drawings • Hammond’s graphing and “puzzle piece” theories help you draw any subject with true-to-life results • Features great tricks you can pass along to other crayon lovers in your life, regardless of age You simply won’t believe what you can accomplish with this familiar and affordable medium. Rediscover the creative thrill of opening the “big box,” and infuse your art with a fresh sense of play.

Why are dogs so eager to please their owners? Why are some cats bold and others shy? And why do chickens hide their eggs? In this follow-up to her groundbreaking international bestseller, *Animals in Translation*, animal scientist Temple Grandin delivers extraordinary insights into how animals think, helping us give our animals the best and happiest lives - on their terms, not ours. Drawing on her latest research, she identifies the core emotional needs of animals and how to fulfill them. Whether it’s creating a happy home for a dog, encouraging cats to be less antisocial, keeping pigs from being bored, or knowing if the lion pacing in the zoo is miserable or just exercising, Grandin teaches us to challenge our assumptions about animal emotions. This is essential and fascinating reading for anyone who owns or cares for an animal.

Thorough instructions supported by more than 400 step-by-step color photos and 200 detailed drawings cover the entire process of sculpting realistic figures, from selecting clay and gathering essential tools to the basics of modeling the human figure, to incorporating poses, facial expressions,

ethnic and gender subtleties, clothing and painted finishing touches. Easy-to-read maps of the figure illustrate the landmarks of the body, while scale diagrams indicate the simple shapes hidden within the human form, as well as how to combine and model those shapes. For anyone who loves fantasy, romance, nature—or sophisticated crafting—this book is a must-have.

With unique personal insight, experience, and hard science, *Animals in Translations* is the definitive, groundbreaking work on animal behavior and psychology. Temple Grandin’s professional training as an animal scientist and her history as a person with autism have given her a perspective like that of no other expert in the field of animal science. Grandin and coauthor Catherine Johnson present their powerful theory that autistic people can often think the way animals think—putting autistic people in the perfect position to translate “animal talk.” Exploring animal pain, fear, aggression, love, friendship, communication, learning, and even animal rights, Grandin is a faithful guide into the world. *Animals in Translation* reveals that animals are much smarter than anyone ever imagined, and Grandin, standing at the intersection of autism and animals, offers unparalleled observations and extraordinary ideas about both.

The book is about a 12 year old girl who’s mom decide to leave her dad whom she was very close, than is given to an uncle which results in her running away trying to find a place to belong but instead gets involved in drugs, alcohol, homosexuality, and prostitution with attempts to end her miserable life she has a son named Carl God uses holes in his shoes to give her a reason and a will to live by pointing to the holes and saying you see you not just bringing yourself down you are taking him down with you after 21 years God stepped in and her deliverance began.

Drawing on the latest scientific research and her own work with animals, the author discusses the emotional needs of animals and how to fulfill them, challenging common myths about animal emotions, mental stimulation, and emotional well-being.

Beyond Words

A personal journey into our evolving relationships with animals, and a thought-provoking look at how those bonds are being challenged and reformed across disciplines We love animals, but does that make the animals’ lives any happier? With factory farms, climate change and deforestation, this might be the worst time in history to be an animal. If we took animals’ experiences seriously, how could we eat, think and live differently? How to Love Animals is a lively and important portrait of our evolving relationship with animals, and how we can share our planet fairly. Mance works in a slaughterhouse and on a pig farm to explore the reality of eating meat and dairy. He explores our dilemmas over hunting wild animals, over-fishing the seas, visiting zoos and saving wild spaces. What might happen if we extended the love we show to our pets to other sentient beings? In an age of extinction and pandemics, our relationship with animals has become unsustainable. Mance argues that there has never been a better time to become vegetarian or vegan, and that the conservation movement can flourish, if people in wealthy countries shrink their footprint. Mance seeks answers from chefs, farmers, activists,

philosophers, politicians and tech visionaries who are redefining how we think about animals. Inspired by the author’s young daughters, his book is a story of discovery and hope that outlines how we can find a balance with animals that fits with our basic love for them.

From the New York Times-bestselling author of *The Hidden Life of Trees*. “The Inner Life of Animals will rock your world. This book shows us that animals think, feel and know in much the same way as we do.”—Sy Montgomery, bestselling author of *The Soul of an Octopus* Through vivid stories of devoted pigs, two-timing magpies, and scheming roosters, *The Inner Life of Animals* weaves the latest scientific research into how animals interact with the world with Peter Wohlleben’s personal experiences in forests and fields. We learn that horses feel shame, deer grieve, and goats discipline their kids. Ravens call their friends by name, rats regret bad choices, and butterflies choose the very best places for their children to grow up. In this captivating book, Peter Wohlleben follows the hugely successful *The Hidden Life of Trees* with insightful stories into the emotions, feelings, and intelligence of animals around us. Animals are different from us in ways that amaze us—and they are also much closer to us than we ever would have thought. “Wry, avuncular, careful and kind. . . Each story adds to a widening vision of intelligence, emotion and relationship.”—The Guardian Published in Partnership with the

Scientific experiments using animals have contributed significantly to the improvement of human health. Animal experiments were crucial to the conquest of polio, for example, and they will undoubtedly be one of the keystones in AIDS research. However, some persons believe that the cost to the animals is often high. Authored by a committee of experts from various fields, this book discusses the benefits that have resulted from animal research, the scope of animal research today, the concerns of advocates of animal welfare, and the prospects for finding alternatives to animal use. The authors conclude with specific recommendations for more consistent government action.

A NEW YORK TIMES NOTABLE BOOK OF 2020 “In this superbly articulate cri de coeur, Safina gives us a new way of looking at the natural world that is radically different.”—The Washington Post New York Times bestselling author Carl Safina brings readers close to three non-human cultures—what they do, why they do it, and how life is for them. A New York Times Notable Books of 2020 Some believe that culture is strictly a human phenomenon. But this book reveals cultures of other-than-human beings in some of Earth’s remaining wild places. It shows how if you’re a sperm whale, a scarlet macaw, or a chimpanzee, you too come to understand yourself as an individual within a particular community that does things in specific ways, that has traditions. Alongside genes, culture is a second form of inheritance, passed through generations as pools of learned knowledge. As situations change, social learning—culture—allows

behaviors to adjust much faster than genes can adapt. *Becoming Wild* brings readers into intimate proximity with various nonhuman individuals in their free-living communities. It presents a revelatory account of how animals function beyond our usual view. Safina shows that for non-humans and humans alike, culture comprises the answers to the question, “How do we live here?” It unites individuals within a group identity. But cultural groups often seek to avoid, or even be hostile toward, other factions. By showing that this is true across species, Safina illuminates why human cultural tensions remain maddeningly intractable despite the arbitrariness of many of our differences. *Becoming Wild* takes readers behind the curtain of life on Earth, to witness from a new vantage point the most world-saving of perceptions: how we are all connected.

The popularity of manga among young people who love to draw continues to grow. In her third manga book, J.C. Amberlyn focuses on her favorite subject matter, animals, with a fun and lively how-to-draw book aimed at beginners. How to Draw Manga Animals takes readers through all the step-by-step drawing instructions they need to learn how to successfully create their own super-cute manga animal characters as well as the worlds they live in. In *How to Draw Manga Animals* J.C. Amberlyn takes readers through all the drawing techniques they’ll need to create a cast of manga-style animal characters. What makes a good character design? This book looks at elements in creating a manga-style animal character with appeal, exploring archetypes and other familiar types of characters as well as how to add unexpected or unique elements that give characters a memorable twist. In addition, readers will learn to draw cute chibi critters and dangerous-looking monsters and everything in between for comics, games, or simply their own personal enjoyment. This book includes chapters on some common or notable real and mythological Japanese animals to provide readers a foundation of knowledge to start their own animal character designs.
