The Critique of Pure Reason,
published by Immanuel Kant in
1781, is one of the most complex
structures and the most
significant of modern philosophy,
bringing a revolution at least as

Page 24/101

great as that of Descartes and his Discourse on Method. The complexity of the first review (the second is the critique of practical reason, and the third is a critique of the faculty of judging), is such that Kant himself published an

introductory text, entitled
Prolegomena to Any Future
Metaphysics.

The Critique of Pure Reason brings together two opposing schools of philosophy: rationalism, which grounds all our knowledge in reason, and

Page 35/101

empiricism, which traces all our knowledge to experience. Kant's transcendental idealism indicates a third way that goes far beyond these alternatives.
