will give you ideas for dozens of fun projects to enjoy with your family. The book starts with a quick tour of what's needed for the projects in the book, which doubles as a guide to buying a new PC or products to enhance your current one. Projects in the book include

Page 45/103

d-link-viewcam-user-manual

creating custom photos albums to share, editing photos to add effects or retouch, uploading home movies to edit and burn to DVDs, sharing video or photos over the Internet, and turning a PC into a home recording studio. Later chapters offer a quick guide to streaming video

and audio to a TV and stereo in the living room. The author creates each project with tools that are both affordable and easy-to-use, and finishes with pointers to more advanced software should you want to explore further. Unlike other books on digital media, the

activities in Family Computer Fun are designed with the family in mind, with software that anyone can use and projects that will be fun for the entire family to explore together. This is a handbook for readers who wish to learn more about providing services to

individuals who are deaf or hard of hearing. It provides basic knowledge of Deaf Culture and the hard of hearing population, the aesthetics of American Sign Language, and an awareness of hearing loss and its influence on family and community life.
