

Dc Switchgear Entec E E

Entec's DC Switchgear(ETGR21, ETGR22) is designed for the application in DC Traction Power System of both 900V DC and 1800V DC. The rated current can be 4000A and 6000A for various system voltage levels, and they can also be utilized in heavy DC Application. All the main components, such as High...

Entec Electric & Electronic Co., Ltd. by Ronda de Negocios ...

In an electric power system, switchgear is composed of electrical disconnect switches, fuses or circuit breakers used to control, protect and isolate electrical equipment. Switchgear is used both to de-energize equipment to allow work to be done and to clear faults downstream. This type of equipment is directly linked to the reliability of the electricity supply.
