Every now and then a band comes along that defies convention, refuses to be pigeon-holed, thumbs its nose at comfy predictability and blows raspberries at commercial wisdom. That band is Gong. From 1970 to the present day, Gong have ploughed a unique musical furrow - part progressive rock, part spacey psychedelia, part proto-punk, ambient trance, drum 'n' bass and absurdist political performance art. With a cup of tea in hand (and a revolving propellor on his head) long-time fan Kevan Furbank examines all the Gong albums from Magick Brother in 1970 to 2019's The Universe Also Collapses, chronicles the stories behind each recording and examines the songwriting, arrangements and mythology that inspired each track - with new insights from Gong bassist Mike Howlett and synth wizard Tim Blake. In doing so, he also looks at the contributions made by the many great musicians who have passed through Gong in the last 50-odd years, including guitar hero Steve Hillage, mercurial drummer Pierre Moerlen, flute and sax maestro Didier Malherbe and, of course, hippy foole, whimsical visionary and Gong founder Daevид Allen. He also attempts to gather together the branches and off-shoots of the Gong family tree - including Mother Gong, Gongmaison and Pierre Moerlen's Gong - and the important solo recordings.If you have never heard any Gong, this book is the perfect introduction. If you have, you will want to go back and revisit the glorious music this band has made. In the words of the Pot Head Pixies, why don't you try...

This paper presents a methodology for adjusting measures of income and poverty for the risk faced by a household. The approach draws on the standard economic concept of risk aversion, and it is based on the intuition that households will prefer a steady stream of income to a variable on with the same mean. Based on a True Story, an Utterly Inputdownable and Heart-wrenching World War 2 Page-turner

Germany, 1941: "We live together, or we die together." A novel that will stay with you forever, The Girl Who Survived tells the inspiring true story of Ilse Stein, a German Jew who was imprisoned in a ghetto--and who fell in love with the man she was supposed to loathe. For Ilse life is unrecognizable. A year ago, she wasn't forced to wear a star on her clothes. A year ago, her parents were alive, not yet killed by their own countrymen. A year ago, she had her freedom. Now, at the break of dawn, she steps off the cattle train into a Minsk ghetto. This is Ilse's new home: trapped by barbed wire, surrounded by SS guards she is forbidden to look in the eye, with no choice but to trade the last of her belongings for scraps of food. Sentenced for the crime of simply existing, she doesn't expect to live past the summer. Yet the prisoners in the ghetto refuse to give up--the underground resistance is plotting their escape. Ilse's first act of defiance is smuggling from the munitions factory, slipping bullets into the lining of her pockets. But this is just the beginning... When Ilse meets Wilhem, a local SS administrative officer, she never dreams that her greatest rebellion will be falling for him. Wilhem promises that she will survive, even if the cost is his life. But in a world of such danger, daring to love is the most dangerous risk of all... Fans of The Tattooist of Auschwitz, The Choice, and The Orphan Train will be completely gripped by this heartbreaking tale. Truth [troot] n. 1.actuality or actual existence. Sentence: Roger knew that the fact that he loved Melanie was the truth. Dare [dar] v. 1.defy or challenge (someone) to do something. When separated, there's really nothing to them. Roger King is a very well-liked person. With his two best friends, Kyle and Max, he managed to make his way through high school and into his senior year. Out of his friends, he seemed angelic, trustworthy. But even angels can make mistakes. Melanie Cross is a band geek. She managed to go through high school, unnoticed. She's never been on a date, not until now. Not until Roger entered her life. Will they be unstoppable, or is there simply nothing to them?

The recommendations summarise the state of the art. Their aim is the proper exploitation of the ground for geothermal purposes without adversely affecting the ground or the groundwater on the one hand and the operation of the system and nearby buildings on the other. The recommendations should be used during consulting, design, installation and operation in order to achieve optimum and sustainable use of the ground at a specific location. Authorities responsible for supervising and approving projects can use the recommendations as a guide when taking decisions and making stipulations. The Geothermal Energy Study Group was set up in Bochum in 2004 and became the joint DGGV/DGGT study group in 2007. Some 20 specialists from universities, authorities and engineering consultants are active in the group and meet two or three times a year.
