This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue

centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet. The very best portrait photography strives to give the viewer access into their subject's

inner self; to provide a window into their soul. With the advent of the digital age and the potential afforded by post-processing, a whole generation of photographic artists has access to greater creative possibilities than ever before. Spearheading this new breed of creative photographer is author Natalie Dybisz, better known in the photographic community as Miss Aniela. Devoted to exploring portraiture at its most creative portraits with context, story, and constructed elements Creative Portrait Photography takes the reader on a behind-the-scenes journey through the creation of

Natalie Dybisz's innovative digital portraits, from first concept to post-processing. Also featuring an extensive showcase chapter in which other photographer-artist's work and working methods are laid bare, Creative Portrait Photography has everything you need to inspire you and transform your perspective on portrait photography.

Their site, and now this book, offer extensive, in-depth tutorials both for budding iPhoneographers looking to advance their craft, and professionals attempting to harness a new toolkit in service of their vision. What they bring to the table is their belief that 'revealing the man behind the curtain' does not diminish the teacher. Technique does not the artist make, but it does enable the newcomer to find his or her own voice. With thousands of apps
