DPMA is a binary Asterisk module that provides a means of secure communication between Digium phones and Asterisk. This secure means is used to provision and manage the phones and to provide direct access to Asterisk's internal applications. DPMA is not required to use Digium phones, but offers a number of significant advantages.

Digium Phone Module for Asterisk (DPMA) - Digium's ...

The Digium Phone Module for Asterisk (DPMA) is used with Digium D-Series IP phones to ensure a secure, easy installation process and to take advantage of the power of Asterisk. Without complicated scripting, DPMA provides direct integration of Digium D-Series phones and many Asterisk capabilities, including voicemail, call parking, call recording; and, for the first time in Asterisk, user presence.

Digium Phone Module for Asterisk ? Sangoma

A Digium phone can communicate with Asterisk, or with any other SIP-based system. In this respect, a Digium phone is somewhat like other SIP phones. In order to provide more than just the capabilities of a regular SIP phone, Digium makes available the Digium Phone Module for Asterisk (DPMA).

Digium Phone Module for Asterisk (DPMA) v 2.0 - Digium's ...

Configuration of a phone via the Digium Phone module for Asterisk alone is not enough to enable calling between the phone and Asterisk. As with any SIP device that connects to Asterisk, each Digium phone needs a corresponding entry in Asterisk's SIP configuration. Further, use of DPMA assumes that out-of-call MESSAGE support has been enabled, and will require some specific "general" section parameters.

Digium Phones when used with DPMA - Digium's Asterisk ...

What is the Digium Phones module used for? This module provides a solution for configuring Digium phones and the Digium Phone Module for Asterisk (DPMA). A license for DPMA is required. DPMA is a binary Asterisk module that provides a secure communications channel between Digium phones and Asterisk for the purposes of provisioning and managing the phones, and for providing direct access to Asterisk's internal applications.
