

Directed Skills Section Plant Processes Answer Key

Directed Skills Section Plant Processes

Bituminous coal is formed when. a. increased temperature and pressure of more sediments compacts lignite. b. decreased temperature and pressure of more sediments compacts lignite. c. Earth's crust folds, producing higher temperatures and pressure. that you can succeed in your studies. The booklet contains a Directed Reading worksheet and a Vocabulary and Section Summary worksheet for each section of the chapter. Use these worksheets in the following ways: • as a reading guide to identify

and study the main concepts of each chapter before or after you read the text

True-breeding plants are important because he then knew what to expect if his plants self-pollinated. 14. Answers will vary. Sample answer: Mendel removed the anthers of one plant so that the plant could not self-pollinate. He then did the cross-pollinating himself.

15. C 16. B 17. A 18. B 19. A 20. C 21. D SECTION: TRAITS AND INHERITANCE 1. C ...

Directed Skills Section Plant Processes

Directed Reading A SECTION: PHOTOSYNTHESIS 1. C 2. the process by which plants make their own food 3. glucose 4. B 5. A 6. chlorophyll 7. Chlorophyll reflects more wavelengths of green light than wavelengths of other colors. 8. Light energy is used to help form glucose. 9. oxygen 10. the process by which cells use oxygen

to release energy from food 11. sucrose, starch

Skills Worksheet Directed Reading A - Mrs. Pierce's Class

Skills Worksheet Directed Reading A Section: What Is a Plant? 1.

Why couldn't you eat much without plants? _____

PLANT CHARACTERISTICS _____ 2. What is the name of the

green pigment that captures energy from the sun? a. organelles c.

carbon dioxide b. chlorophyll d. chloroplasts _____ 3. Plants use

energy from sunlight to make ...

Skills Worksheet Directed Reading A

Modern green algae and plants contain the same kinds of chlorophyll. They both make food through photosynthesis. They both store energy as starch. They both have a two-stage life cycle.

They have similar cell walls. SECTION: SEEDLESS PLANTS 1. nonvascular plants: liverworts, mosses, hornworts; seedless vascular plants: horsetails, ferns, club mosses 2. B 3. C 4.

Skills Worksheet Directed Reading A - Mrs. Pierce's Class

Directed Reading B continued Photosynthesis Circle the letter of the best answer for each question. 8. In photosynthesis, what two things do plants use with sunlight to make food? a. water and oxygen b. water and sugar c. water and carbon dioxide d. water and salt 9. What food do plants make for themselves? a. salt b. glucose c. chlorophyll d. heat

Skills Worksheet Directed Reading B

Skills Worksheet Directed Reading A Section: Cell Energy Use the

terms from the following list to complete the sentences below. sun
food reproduce 1. All cells need energy to live, grow, and . 2. Plant
cells get their energy from the . 3. Many animal cells get the energy
they need from . FROM SUN TO CELL

Skills Worksheet Directed Reading A

berries. An owl uses flowering plants indirectly as food when it eats
a field mouse. 36. Answers will vary. Sample answer: major food
crops, such as corn, wheat, and rice; as building materials; to make
clothing and rope; to make medicines, rubber, and perfume oils
SECTION: STRUCTURES OF SEED PLANTS 1. B 2. C 3.
underground 4. Answers will vary. Sample answer:
