Disorders of Carbohydrate Metabolism (Russian Edition) ...

Carbohydrate metabolism disorders are a group of metabolic disorders. Normally your enzymes break carbohydrates down into glucose (a type of sugar). If you have one of these disorders, you may not have enough enzymes to break down the carbohydrates. Or the enzymes may not work properly. This causes a harmful amount of sugar to build up in your body.

Carbohydrate Metabolism Disorders: MedlinePlus

Disorders of Carbohydrate Metabolism (Russian Edition) by ...

Congenital disorders of glycosylation (CDG; formerly known as carbohydrate-deficient glycoprotein syndrome) are recently described diseases that affect the brain and many other organs. The primary biochemical defects of CDG are in the N-glycosylation pathway that occurs in the cytoplasm and endoplasmic reticulum , cellular organelles involved in the synthesis of proteins and lipids.

Metabolic disease - Disorders of carbohydrate metabolism ...

Mechanism of arising changes in the carbohydrate and insulin metabolism is complex and multicomponent. This includes renal lesion and consequent inhibition of hormone metabolism. Intensification of glomerular filtration is associated with inhibition of filtration of insulin and C-peptide derivants. Accumulation of nitrogen metabolism products results in changed response of pancreatic beta-cells to glucose.
