Diversity in Living Organisms : Chapter Notes - DronStudy.com

Diversity in living organisms 1. The hierarchy of classification – Groups :- Living organisms have been broadly classified into five main kingdoms. They are :- i) Monera ii) Protista iii) Fungi iv) Plante v) Animalia Each kingdom has been further classified into smaller sub - groups at various levels as :- Kingdom Phylum (for plants) / Division (for animals) Class Order Family Genus Species

Diversity In Living Organisms Wikipedia

Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species.The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.

Organisms Diversity & Evolution | Home

Diversity of organisms. The total number of species living on the planet is imprecisely known and published estimates vary from 12 million to over 100 million. This is because there are large numbers of species yet undiscovered and undescribed, and there is not always agreement on whether certain organisms should be regarded as separate species.
