

Domestic Fire Sprinkler Pump Boost&n Data Sheet

Jockey & Booster Pumps As a major supplier of specialist products to the fire sprinkler industry, SEP has access to preferential pricing and top quality support to enable us to supply the best jockey and booster pump for your needs.

Where provided, fire pump rooms and automatic sprinkler system riser rooms shall be designed with adequate space for all equipment necessary for the installation, as defined by the manufacturer, with sufficient working space around the stationary equipment. Clearances around equipment to elements of permanent construction, including other installed equipment and appliances, shall be sufficient ...

#8 Fire Department Connection: Connection used by the fire department to pump water into the fire sprinkler or standpipe system to supplement the building's water supply. Otherwise known as an FDC, or siamese connection (since there are two inlets on the connection), this connection is located on the exterior of the building.

Homes on well water most likely will need a pump to serve the domestic water supply. The cost associated with providing additional pressure to run the fire sprinkler system may simply be the difference between the regular pump the homeowner must install to obtain the necessary pressure for domestic use, and a higher flow pump, or a booster pump ...
