Eighteen million Vespas have buzzed their way into the world since 1946. Stood end to end, they would form a line measuring 32,000 kilometres – 20,000 miles – in length. This is an almost inconceivable statistic, as with many things that transcend conventional measures and at some point achieve cult status. How did the little machine come so far? The answer is simple. The Vespa has always remained the Vespa, true to itself, and has what others lack: real character! This book tells the Vespa's story via over 470 photos, corrects many misconceptions and lets the reader become immersed in the culture of Vespa and la bella vita.

Scooter Mania! Recollections of the Isle of Man International Scooter Rally offers a complete history of the event including competitors and organizers personal experiences, the controversies and difficulties experienced by the Rally Committee in what became a remarkable 20 year chapter in the history of Scootering Sport and Tradition.

The Lotus Europa was Colin Chapman and Lotus's first mid-engined road car, and was produced from 1966 through to 1975.

Originally designed to slot into the Lotus range below the Elan as a low cost replacement for the Lotus 7, the Europa eventually sat alongside the Elan and Plus 2 as a comparable sports car in its own right. Starting with the design philosophy behind the development of the Europa, this book provides detailed technical descriptions of all the major versions of the model, starting with the Renault-powered Series 1 through to the Lotus Twin Cam powered Special. It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well as featuring in historic racing today. With owners' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and racing these iconic cars.

Turner then determines to visit St. Petersburg, a mere 1700km east, before heading back home to London, via most of Poland and a good deal of Germany.

Ducati Desmoquattro Performance Handbook

Mercedes-Benz W123 series

The 916 spearheaded the Ducati revival of the 1990s. Introduced at the end of 1993, this product of Massimo Tamburini and the Cagiva Research Centre took the water-cooled four-valve engine of the 851, placing it in an evolutionary chassis with revolutionary styling. The 916 immediately set new standards of performance for twin-cylinder machines, epitomised by its unequalled success in the World Superbike Championship. This book will trace the conception and development of the four-valve Ducati from its first appearance at the Bol d'Or in 1986. By 1990 Raymond Roche gave Ducati their first World Superbike Championship, this being followed by Texan Doug Polen. Star British rider Carl Fogarty then took over the reins, and along with Troy Corser and Troy Bayliss dominated the World Superbike Championship from 1994 until 2001. Along with the factory racers, all the related four-valve models will be covered in depth, from the initial 851 and 888, to the 748, ST4 and 996. All the variants, including the Sport Production series, will be detailed, along with the rare and beautiful Supermono. This book is the definitive guide to these legendary Ducati models. Ian Falloon is one of the world's leading motorcycle historians. He has more than 40 years experience with motorcycles, spent 25 years writing for magazines around the world, and has written numerous books about motorcycles. He specialises in Italian marques such as Moto Guzzi, Laverda, MV Agusta, and of course, Ducati.

Ducati stunned the world in 1988 when the struggling, small Italian firm unleashed its Desmoquattro -- 8-valve, desmodromic -- Superbike. The bike found success on the world's racetracks right from the start. Road-going versions soon carried that success to the general public, proving this design wasn't just another noisy prototype. The Superbikes -- 748, 851, 888, 916, and 996 -- are now Ducati's best-selling machines in the United States; and the Desmoquattro engine found its way into the company's more pedestrian series such as the Monster roadster and ST4 sport-tour. This is the comprehensive volume on Ducati's ultimate performance motorcycles and replaces the out-of-print Ducati Super Bikes: 851, 888, 916.

Many books have been published about Italian motorcycles, but none has focused exclusively on the Italian motorcycle-based chopper, bobber, trike, and quad custom bike scene – until now. Even though customising is not normally associated with Italian brands, there are some fantastic individually-built Italian custom bikes out there, old and new. In recognition of the trend, Ducati entered into a new market segment when it launched its power cruiser Diavel in November 2010, while Moto Guzzi has its Aquila Nero range ... these and many other custom-style bikes have been well-received in the customs scene. This book looks at some of the fascinating custom projects around the world, accompanied by stunning photography of the finished bikes.
