Buku ini adalah hasil kontemplasi saya selama bertahun-tahun bergelut di dunia keilmuan. Saya merasa banyak sekali pertanyaan tentang manusia yang belum terjawab secara gamblang di kelas-kelas formal. Saya sering mendapatkan ilmu yang mencerahkan tentang manusia dan interaksinya dari obrolan bersama rekan. Kadang jati diri manusia saya pelajari dari film, cerpen, dokumenter, maupun buku-buku referensi tentang filosofi dan sains. Buku ini adalah ringkasan dari serpihan semua informasi itu. Serpihan-serpihan tersebut kemudian saya jahit menjadi sebuah simplifikasi konsep rumit bernama manusia. Melalui buku ini saya

ingin mengajak pembaca untuk melihat manusia sebagai makhluk yang mekanistik. Saya menahan diri untuk tidak membahas tentang jiwa atau konsep transedental lainnya. Buku ini sengaja didesain untuk membahas cara kerja manusia secara mekanistik dan behavioristik. Harapannya adalah dengan memahami konsep dirinya sendiri secara mekanistik, pembaca dapat lebih menghargai dirinya sendiri dan orang lain. Buku ini dapat menjadi suplemen bagi pembaca yang menyukai filosofi dan sains. Ada banyak wacana yang cukup baru untuk dijadikan sebagai bahan renungan. Beberapa bagian dari buku ini membahas beberapa isu kontroversial seperti homoseksualitas dan perbudakan. Di sisi lain, buku ini juga membahas hal-hal ringan seperti dongeng dan puisi cinta. Apapun yang anda cari tentang jati diri manusia, kemungkinan besar akan dibahas di salah satu bab di buku ini.

Selamat menikmati.

This book presents an ecophilosophy of cinema: an account of the moving image in relation to the lived ecologies – material, social, and perceptual relations – within which movies are produced, consumed, and incorporated into cultural life. If cinema takes us on mental and

Longtime producer Palmer provides an in-depth look at wild animals on film, covering the history of wildlife documentaries, safety issues, and the never-ending pressure to obtain the money shot. Marlin Perkins, Jacques Cousteau,

Steve Irwin, Timothy Treadwell, and many other familiar names are discussed along with their work, accidents, and in some cases, untimely deaths. Palmer is highly critical of Irwin, and offers fascinating revelations about game farms used by exploitative filmmakers and photographers looking for easy shots and willing to use caged animals to obtain them. He also considers the subliminal messages of many wildlife films, considering everything from Shark Week to Happy Feet and how they manipulate audiences toward preset conclusions about animal behavior. In all this is an engaging and exceedingly timely look at a form of entertainment the public has long taken for granted and which, as Palmer points out, really needs a fresh and careful reconsideration.

Sastra anak kini semakin menarik perhatian orang dan telah masuk ke dalam kurikulum di berbagai perguruan tinggi. Namun, sayangnya belum banyak

literatur tentang sastra anak yang ditulis dalam bahasa Indonesia. Buku ini sengaja ditulis untuk mengisi "kekosongan" itu dan dapat dijadikan sebagai salah satu bacaan mahasiswa jurusan sastra dan bahasa, atau pembaca lainnya yang berminat, untuk dapat menambah pengetahuan dan wawasan tentang hal-hal yang berkaitan dengan sastra anak. Cakupan (baca: genre) sastra anak relatif luas, justru lebih luas daripada sastra dewasa, dan buku

ini berusaha untuk merambah berbagai genre sastra anak yang dimaksud mulai dari sastra tradisional, fiksi, puisi, buku informasi, dan komik. Namun, sebelumnya dikemukakan hal-hal yang berkaitan dengan pengetahuan umum tentang sastra anak dan perkembangan kejiwaan anak, sastra anak di usia awal, sastra dan literasi, dan buku-buku yang sesuai untuk anak di usia awal. Pembicaraan per genre sastra anak diusahakan sesederhana mungkin dan

dilengkapi contoh-contoh secara konkret.

If there is one thing that the Covid 19

our own Self. The Self that we have neglected and ignored during our busy lives interacting with the outside world, but which many of us could no longer avoid as we spend more time at home and shy away from public places. We can however, turn these difficult times into a learning lesson that is both transformative and beneficial. Reducing our social interactions allows us more time for self-reflection and for reconnecting with our selves. Spending time on our own is a rare and priceless opportunity to discover who we really are and to ask those fundamental questions about life and existence which we

might have taken for granted or spare very little thoughts about. In this book, a compilation of musings and random thoughts that the author captured during the time of the Corona, Desi Anwar tries to show that solitude is neither a torment nor an affliction to be feared and avoided. Indeed, when embraced in its fullness, solitude becomes an art that is both enlightening and therapeutic.

Apakah bumi terbentuk melalui proses

berusia 4,5 miliar tahun, apakah itu berarti saya menyangkali otoritas Alkitab? D Dalam menanggapi kontroversi yang terus berkelanjutan seputar penafsiran dari narasi penciptaan dalam Kitab Kejadian, Prof. John Lennox mengajukan metode ringkas dalam membaca dan menafsirkan Kitab Kejadian tanpa meninggalkan prinsip sains maupun Alkitab. Dilengkapi dengan berbagai contoh dari sejarah, eksplorasi singkat tetapi menyeluruh dari berbagai penafsiran, dan melihat signifikansi khusus dalam penciptaan umat manusia, Dia

menunjukkan bahwa orang Kristen dapat merengkuh sains modern juga tetap setia pada Alkitab. Dia bergerak mengatasi tanggapan sederhana seputar kontroversi penciptaan dengan menegaskan bahwa Kitab Kejadian mengajarkan kita jauh lebih banyak tentang Allah dan maksud Allah dalam penciptaan daripada sekadar kontroversi tentang bumi.

During the last 140 years, Darwinism that rejects the fact of creation, and therefore the existence of Allah, has caused many people to abandon their faith or fall into doubt, Therefore, showing that this theory is a deception is a very important duty, which is strongly related to the religion. This book offers an integrated study of

the texts and images in illustrated Malay manuscripts on magic and divination from private and public collections in Malaysia, the UK and Indonesia. Richly illustrated, it contains rare examples of Malay painting, many of them published here for the first time.

Kehidupan tak pernah lepas dari proses menghadapi perubahan, mengambil keputusan, mengatasi rintangan, dan meraih tujuan. Di ujung perjalanan itu,

setiap manusia mendambakan keberhasilan dan kebahagiaan. Dan mimpi menguatkan manusia melewati perjalanannya. Semua orang punya mimpi. Tapi hanya sedikit yang berhasil meraihnya karena sebagian besar lainnya hanya menatap mimpi mereka. Ciputra, Prof. Herman Johannes, Bill Cosby, Nelson Mandela, Steve Irwin, Michael Dell, dan Edmund Hillary adalah beberapa di antara sedikit orang itu. Mereka adalah orang-orang yang punya mimpi besar. Hebatnya, mereka

tidak hanya terpana menatap mimpi-mimpi itu. Mimpi mereka membentuk keyakinan. Keyakinan membentuk tindakan. Dan tindakan itu mengantar mereka pada keberhasilan. Semua mimpi, kerja keras, dan keberhasilan mereka terpapar dalam buku ini bersama sederetan tokoh sukses lainnya. Buku ini memberi daya pada kita untuk mengatasi tantangan dan perubahan hidup sehari-hari. Karena ternyata kita lebih kuat dari anggapan kita dan karena hidup adalah pilihan,

bukan sekadar peluang.

First published in 1983, *The Ethics of Environmental Concern* has become a classic in the relatively new field of environmental ethics. Examining

Page 40/44

traditional attitudes toward nature, and the degree to which these attitudes enable us to cope with modern ecological problems, Robin Attfield looks particularly at the Judeo-Christian heritage of belief in humankind's dominion, the tradition of stewardship, and the more recent belief in progress to determine the extent to which these attitudes underlie ecological problems and how far they embody resources adequate for combating

such problems. He then examines concerns of applied ethics and considers our obligations to future generations, the value of life, and the moral standing and significance of nonhumans. Simultaneously, he offers and defends a theory of moral principles appropriate for dealing with such concerns as pollution, scarce natural resources, population growth, and the conservation and preservation of the environment. The second edition

includes a new preface and introduction, as well as a bibliographic essay and an updated list of references incorporating relevant scholarship since the publication of the first edition.
