

## **Emergency Care 12th Edition Audiobook**

By the co-writer of the HBO miniseries *The Night Of* Richard Price's New York Times bestseller, *The Whites*, is an electrifying tale of a New York City police detective under siege-by an unsolved murder, by his own dark past, and by a violent stalker seeking revenge. Back in the run-and-gun days of the mid-1990s, when a young Billy Graves worked in the South Bronx as part of an aggressive anti-crime unit known as the Wild Geese, he made headlines by accidentally shooting a ten-year-old boy while struggling with an angel-dusted berserker on a crowded street. Branded as a loose cannon by his higher-ups, Billy spent years enduring one dead-end posting after another. Now in his early forties, he has somehow survived and become a sergeant in Manhattan Night Watch, a small team of detectives charged with responding to all post-midnight felonies from Wall Street to Harlem. Mostly, his unit acts as little more than a set-up crew for the incoming shift, but after years in police purgatory, Billy is content simply to do his job. Then comes a call that changes everything: Night Watch is summoned to the four a.m. fatal slashing of a man in Penn Station, and this time Billy's investigation moves beyond the usual handoff to the day tour. And when he discovers that the victim was once a suspect in the unsolved murder of a twelve-year-old boy-a savage case with connections to the former members of the Wild Geese-the bad old days are back in Billy's life with a vengeance, tearing apart enduring friendships forged in the urban trenches and even threatening the safety of his family. Razor-sharp and propulsively written, *The Whites* introduces Harry Brandt--a new master of American crime fiction.

In this personal journey through a unique performing art, David Copperfield profiles some of the world's most groundbreaking magicians. From the sixteenth-century magistrate who wrote an early book on conjuring, to the roaring twenties and the man who fooled Houdini, to the woman who levitated, vanished, and caught bullets in her bare hands, David Copperfield's *History of Magic* takes you on a wild journey through the remarkable feats of some of the greatest magicians in history. The result is a sweeping tale that reveals how these astonishing performers were outsiders who used magic to escape class, challenge conventions, transform popular culture, explore the innermost workings of the human mind, and inspire scientific discovery. Their incredible stories are complemented by more than 100 never-before-seen photographs of artifacts from Copperfield's exclusive Museum of Magic, including a sixteenth-century manual on sleight-of-hand; Houdini's straitjackets, handcuffs, and water torture chamber; Dante's famous sawing-in-half apparatus; Alexander's high-tech turban that allowed him to read people's minds; and even some coins that may have magically passed through the hands of Abraham Lincoln. By the end of the book, you'll be sure to share Copperfield's passion for the power of magic. --

Rev. ed. of: First aid/CPR/AED for schools and the community. 3rd ed. c2006. A practice-based guide to applying the principles of human-centered design to real-world health challenges; updated and expanded with post-COVID-19 innovations. This book offers a practice-based guide to applying the principles of human-centered design to real-world health challenges that range from drug packaging to breast cancer detection. Written by pioneers in the field—Bon Ku, a physician leader in innovative health design, and Ellen Lupton, an award-winning graphic designer—the book outlines the fundamentals of design thinking and highlights important products, prototypes, and research in health design. This revised and expanded edition describes innovations developed in response to the COVID-19 crisis, including an intensive care unit in a shipping container, a rolling cart with intubation equipment, and a mask brace that gives a surgical

mask a tighter seal. The book explores the special overlap of health care and the creative process, describing the development of such products and services as a credit card–sized device that allows patients to generate their own electrocardiograms; a mask designed to be worn with a hijab; improved emergency room signage; and a map of racial disparities and COVID-19. It will be an essential volume for health care providers, educators, patients, and designers who seek to create better experiences and improved health outcomes for individuals and communities.

Danny North knew from early childhood that his family was different, and that he was different from them. Their home was isolated in the mountains of western Virginia, far from town, far from schools, far from other people. There are many secrets in the House, and many rules that Danny must follow. There is a secret library with only a few dozen books, and none of them in English — but Danny and his cousins are expected to become fluent

in the language of the books. While Danny's cousins are free to create magic whenever they like, they must never do it where outsiders might see. A riveting personal exploration of the healthcare crisis facing inner-city communities, written by an emergency room physician who grew up in the very neighborhood he is now serving Sampson Davis is best known as one of three friends from inner-city Newark who made a pact in high school to become doctors. Their book *The Pact* and their work through the Three Doctors Foundation have inspired countless young men and women to strive for goals they otherwise would not have dreamed they could attain. In this book, Dr. Davis looks at the healthcare crisis in the inner city from a rare perspective: as a doctor who works on the front line of emergency medical care in the community where he grew up, and as a member of that community who has faced the same challenges as the people he treats every day. He also offers invaluable practical advice for those living in such communities, where conditions like asthma, heart disease, stroke, obesity, and AIDS are disproportionately endemic. Dr. Davis's sister, a drug addict, died of AIDS; his brother is now paralyzed and confined to a wheelchair as a result of a bar

fight; and he himself did time in juvenile detention—a wake-up call that changed his life. He recounts recognizing a young man who is brought to the E.R. with critical gunshot wounds as someone who was arrested with him when he was a teenager during a robbery gone bad; describes a patient whose case of sickle-cell anemia rouses an ethical dilemma; and explains the difficulty he has convincing his landlord and friend, an older woman, to go to the hospital for much-needed treatment. With empathy and hard-earned wisdom, *Living and Dying in Brick City* presents an urgent picture of medical care in our cities. It is an important resource guide for anyone at risk, anyone close to those at risk, and anyone who cares about the fate of our cities. Praise for *Living and Dying in Brick City* “A pull-no-punches look at health care from a seldom-heard sector . . . *Living and Dying* isn’t a sky-is-falling chronicle. It’s a real, gutsy view of a city hospital.”—*Essence* “Gripping . . . a prescription to help kids dream bigger than their circumstances, from someone who really knows.”—*People* “[Dr. Davis] is really a local hero. His story has inspired so many of our young people, and he’s got his finger on the pulse of what is a challenge in

Newark, and frankly all across America. . . . I think his book is going to make a big impact.”—Cory Booker “Some memoirs are heartfelt, some are informative and some are even important. Few, however, are all three. . . . As rare as it is for a book to be heartfelt, well written and inspirational, it’s even rarer for a critic to say that a book should be required reading. This ought to be included in high school curricula—for the kids in the suburbs who have no idea what life is like in the inner cities, and for the kids in the inner cities to know that there is a way out.”—The Star-Ledger “Dramatic and powerful.”—New York Daily News “This book just might save your life. Sampson Davis shares fascinating stories from the E.R. and addresses the inner-city health crisis. His book is an important investment in your most valuable resource: your health.”—Suze Orman, author of *The Money Class*

A practical action plan for reinventing healthcare in a post-pandemic world—from a physician-entrepreneur who works with Fortune 500 companies. If the healthcare system were an emperor, Covid-19 tragically revealed that it had no clothes. Healthcare had to adapt, and quickly?sparking a dramatic acceleration of

virtual care, drive-through testing, and home-based services. In the process, old rules were rewritten and, perhaps surprisingly, largely in a good way for patients. To succeed in the post-pandemic world, all of us—patients, caregivers, providers, employers, investors, technologists, and policymakers—need to understand the new healthcare landscape and change our strategies and behaviors accordingly. In *Care After Covid*, practicing physician and business leader Dr. Shantanu Nundy—Chief Medical Officer of Accolade, which provides technology-enabled health services to Fortune 500 companies as well as small businesses—lays out a comprehensive plan to transform healthcare along three dimensions: Distributed: healthcare will happen where health happens. It will shift from where doctors are to where patients are—at home, in the community, and increasingly on their phones. Digitally enabled: healthcare and the relationships that are central to care will be strengthened by data and technology. It will shift from being siloed to connected, from being episodic to continuous, from one-size-fits-all to more personalized. Decentralized: healthcare decisions and resources will be in the hands of those closest to

care. The power to determine who gets care and how they get it will shift away from governments and insurance companies to communities, employers, doctors, and patients. Filled with firsthand insights and stories from the frontlines of healthcare—as well as innovative solutions that were proven effective before and during the pandemic—Care After Covid shows all stakeholders in the healthcare ecosystem exactly what needs to change and, more importantly, how to do it. The time to act is now. We can't afford not to.

An io9 Can't Miss Science Fiction and Fantasy title in March 2014. Martin Banks is just a normal guy who has made an abnormal discovery: he can manipulate reality, thanks to reality being nothing more than a computer program. With every use of this ability, though, Martin finds his little "tweaks" have not escaped notice. Rather than face prosecution, he decides instead to travel back in time to the Middle Ages and pose as a wizard. What could possibly go wrong? An American

hacker in King Arthur's court, Martin must now train to become a full-fledged master of his powers, discover the truth behind the ancient wizard Merlin...and not, y'know, die or anything.

"Smart and funny, with characters so real and vulnerable, you want to send them care packages. I loved this book." —Rainbow Rowell From debut author Mary H.K. Choi comes a compulsively readable novel that shows young love in all its awkward glory—perfect for fans of Eleanor & Park and To All the Boys I've Loved Before. For Penny Lee, high school was a total nonevent. Her friends were okay, her grades were fine, and while she'd somehow landed a boyfriend, they never managed to know much about each other. Now Penny is heading to college in Austin, Texas, to learn how to become a writer. It's seventy-nine miles and a zillion light years away from everything she can't wait to leave behind. Sam's stuck. Literally, figuratively, emotionally, financially. He works at a café and sleeps there too, on a mattress on the floor of an empty storage room upstairs. He knows that this is the god-awful chapter of his life that will serve as inspiration for when he's a famous movie director but right this second the seventeen bucks in his checking account and his dying laptop are really testing him. When Sam and Penny cross paths it's less meet-cute and more a collision of unbearable awkwardness. Still, they swap numbers and stay in touch—via text—and soon become digitally inseparable, sharing their

deepest anxieties and secret dreams without the humiliating weirdness of having to, you know, see each other.

Reclaim Your Headspace and Find Your One True Voice As a hospital chaplain, J.S. Park encountered hundreds of patients at the edge of life and death, listening as they urgently shared their stories, confessions, and final words. J.S. began to identify patterns in his patients' lives—patterns he also saw in his own life. He began to see that the events and traumas we experience throughout life become deafening voices that remain within us, even when the events are far in the past. He was surprised to find that in hearing the voices of his patients, he began to identify his own voices and all the ways they could both harm and heal. In *The Voices We Carry*, J.S. draws from his experiences as a hospital chaplain to present the Voices Model. This model explores the four internal voices of self-doubt, pride, people-pleasing, and judgment, and the four external voices of trauma,

guilt, grief, and family dynamics. He also draws from his Asian-American upbringing to examine the challenges of identity and feeling "other." J.S. outlines how to wrestle with our voices, and even befriend them, how to find our authentic voice in a world of mixed messages, and how to empower those who are voiceless. Filled with evidence-based research, spiritual and psychological insights, and stories of patient encounters, *The Voices We Carry* is an inspiring memoir of unexpected growth, humor, and what matters most. For those wading through a world of clamor and noise, this is a guide to find your clear, steady voice.

"A bold, new voice." –People "A nuanced addition to the #MeToo conversation." –Vice

A young survivor tells her searing, visceral story of sexual assault, justice, and healing in this gutwrenching memoir. The numbers are staggering: nearly one in five girls ages fourteen to seventeen have been the victim of a sexual assault or attempted sexual assault. This is the true story of one of those girls. In 2014, Chessy Prout was a freshman at St. Paul's School, a prestigious boarding school in New Hampshire, when a senior boy sexually assaulted her as part of a ritualized game of conquest. Chessy bravely reported her assault to the police and testified against her attacker in court. Then, in the face of unexpected backlash from her once-trusted school community, she shed her

anonymity to help other survivors find their voice. This memoir is more than an account of a horrific event. It takes a magnifying glass to the institutions that turn a blind eye to such behavior and a society that blames victims rather than perpetrators. Chessy's story offers real, powerful solutions to upend rape culture as we know it today. Prepare to be inspired by this remarkable young woman and her story of survival, advocacy, and hope in the face of unspeakable trauma.

Haunted by the drug-related death of his identical twin two years earlier, Seattle ER doctor Ben Dafoe is horrified when his former fiancée is targeted in a stabbing attack, a crime in which Ben becomes a prime suspect as he begins to think his twin is still alive.
