## ENGINEERING METROLOGY AND MEASUREMENTS

A metrology engineer must have knowledge of a wide range of engineering disciplines including design, design interpretation, production, manufacturing, quality control, and testing. The act of measuring has become an important part of our everyday lives. The need to measure and standardise has developed into the science of metrology.

The study of measurement is a basic requirement in any field of science and technology, most importantly in engineering and manufacturing. Since metrology is the study of measurement, it is expected to enforce, validate and verify predefined standards for traceability, accuracy, reliability, and precision.
