First published in 1971, *Rules for Radicals* is Saul Alinsky's impassioned counsel to young radicals on how to effect constructive social change and know “ the difference between being a realistic radical and being a rhetorical one. ” Written in the midst of radical political developments whose direction Alinsky was one of the first to question, this volume exhibits his style at its best. Like Thomas Paine before him, Alinsky was able to combine, both in his person and his writing, the intensity of political engagement with an absolute insistence on rational political discourse and adherence to the American democratic tradition.

This book is a detailed examination of social connections to language evaluation with a specific focus on the values associated with both prescriptivism and descriptivism. The chapters, written by authors from many different linguistic and national backgrounds, use a variety of approaches and methods to discuss values in linguistic prescriptivism. In particular, the chapters break down the traditional binary approaches that characterize prescriptive discourse to create a view of the complex phenomena associated with prescriptivism and the values of those who practice it. Most importantly, this volume continues serious academic conversations about prescriptivism and lays the foundation for continued exploration.

Silas Marner is the third novel by George Eliot, published in 1861. An outwardly simple tale of a linen weaver, it is notable for its strong realism and its sophisticated treatment of a variety of issues ranging from religion to industrialisation to community.

Rakesh plants a cherry seedling in his garden and watches it grow. As seasons go by, the small tree survives heavy monsoon showers, a hungry goat that eats most of the leaves and a grass cutter who splits it into two with one sweep. At last, on his ninth birthday, Rakesh is rewarded with a miraculous sight—the first pink blossoms of his precious cherry tree! This beautifully illustrated edition brings alive the magical charm of one of Ruskin Bond's most unforgettable tales.

Arthur Smith Woodward was the Natural History Museum's longest-serving Keeper of Geology and the world's leading expert on fossil fish. He was also an unwitting victim of the Piltdown fraud, which overshadowed his important scientific contributions. The aim of this book is to honour Smith Woodward's contributions to vertebrate palaeontology, discuss their relevance today and provide insights into the factors that made him such an eminent scientist. The last few years have seen a resurgence in fossil vertebrate (particularly fish) palaeontology, including new techniques for the 'virtual' study of fossils (synchrotron and micro CT-scanning) and new research foci, such as 'Evo-Devo' – combining fossils with the development of living animals. This new research is built on a strong foundation, like that provided by Smith

Woodward's work. This collection of papers, authored by some of the leading experts in their fields, covers the many facets of Smith Woodward's life, legacy and career. It will be a benchmark for studies on one of the leading vertebrate palaeontologists of his generation.

Perhaps fitting for a horror short story, the devil is in the details in Poe ' s "The Oval

Portrait" (1842). A benighted traveller finds shelter in an abandoned mansion in the Apennine Mountains of Italy. Inside he gets absorbed by a stunning painting and decides to delve into its origins with the help from a book he finds on a pillow. The story revolves around the complex and often tragic relationship between life and art. As per usual Poe can't help himself to play with layers, and most of the story is told as an embedded narrative. The intense emotional and psychological depths of the narrator's infatuation with the portrait and the enticing volume that helps to shed a light on the painting make this short story another fascinating and haunting and Poesque tale which succinctly glorifies the immortality of art. Edgar Allan Poe (1809-1849) was an American poet, author, and literary critic. Most famous for his poetry, short stories, and tales of the supernatural, mysterious, and macabre, he is also regarded as the inventor of the detective genre and a contributor to the emergence of science fiction, dark romanticism, and weird fiction. His most famous works include "The Raven" (1845), "The Black Cat" (1843), and "The Gold-Bug" (1843).

Arthur Smith Woodward:

High-school writing prompts often ask students to provide overly simplified responses to complicated issues, but a person's stance in the real world can rarely, if ever, be reduced to "agree or disagree." Arguments are complex, with more than two points of view and a range of evidence to consider; however, writing classes don't always embrace that complexity. *Real Writing: Modernizing the Old School Essay* contends that engaging fully with complex texts and difficult, nuanced arguments helps students become better

thinkers and writers, more fully prepared for life both in and after high school.
