

Entomological Field Techniques For Malaria Control Part I Learners Guide Part 1

In biology and zoology, polymorphism

Page 1/14

is the occurrence of two or more clearly different morphs or forms, also referred to as alternative phenotypes, in the population of a species. To be classified as such, morphs must occupy the same habitat at the same time and belong to a panmictic population (one with random

mating).. Put simply, polymorphism is when there are two or more possibilities of ...
