Maz and Bricks is a passionate, angry, funny and touching play which tells the story of two young people who meet over the course of a day in Dublin. Trading the Betfair and sporting markets in-play is rapidly growing in popularity thanks to the increased sporting coverage available on many different satellite and cable channels. Many people start by just using Betfair to obtain better odds than those available at the traditional bookmakers. They then perhaps do a little more research and learn to trade the markets, but to make a regular profit a serious, disciplined and planned approach needs to be employed in order to not only win but keep on winning.

'Mastering Betfair' will take the reader through many of the low-risk strategies developed by the author over the past 3 years. The book also aims to highlight to the Betfair user the importance of employing disciplines - such as managing risk - that are normally associated with the financial markets, and indeed it is hoped that the book will also highlight to the financial trader the unique opportunities that are available on Betfair.

Humorous, Shakespearean-inspired verse about body parts blends with whimsical art in this award-winning science poetry collection from Leslie Bulion. Leslie Bulion's award-winning volume of anatomical verse begins with an invitation to solve a series of poetic riddles: "Of course you have a body, / But do you have a clue / Where all the body parts you've got are found / And what they do?" Each poem that follows poses a puzzle in verse (with a sly wink and a nod to Shakespeare) and provides hints for uncovering the body part in question—from blood, bones, eyes, and the heart to the brain, pancreas, stomach, tongue, and more. Sidebars throughout offer additional facts, while appended notes offer a crash course on poetic form and a few facts about the Shakespearean works that inspired the verses. Mike Lowery's playful, original art adds context along with photographs and a diagram of the human body. A truly unique nonfiction title that's ideal for cross-curricular learning!
