Evidence Based Care For Normal

Evidence-based Care for Normal Labour and Birth brings to light much of the evidence around what works best for normal birth which has, until now, remained largely hidden and ignored by maternity care professionals. Beginning with the decision about where to have a baby, through all the phases of labour to the immediate post-birth period, it systematically details research and other evidence sources that endorse a low intervention approach.

Evidence-based Care for Normal Labour and Birth: A guide ...

In his book, Evidence-Based Care for Normal Labour and Birth: A Guide for Midwives, addressing the relatively new evidence-based care paradigm, he seeks to expand the definition of "evidence" so that qualitative research gains credibility in a technological world enamored of quantification.

However, despite the emphasis on promoting evidence-based or effective care without the unnecessary use of technologies and drugs, intervention rates in childbirth continue to rise rapidly.

Evidence and Skills for Normal Labour and Birth - Routledge

Premised on research, specifically the randomised controlled trial (RCT), evidence-based care is care that is shown to be effective in trials of target populations. Maternity services were ahead of the game here due to the development in the late 1980s of the Cochrane Database (Chalmers et al. 1989).

Evidence-based care: the new orthodoxy for maternity ...

Despite nurses being the largest group of health professionals in the majority of health care systems worldwide, three immediate and internationally recognized challenges largely affect their ability to provide services including evidence-based care: 1) Limitations with health care systems, leading to decreased support for their education and development; 2) Prejudice against their intent to advance their practice; and, 3) Issues associated with workforce reduction.

EvidenceCare delivers instantly accessible evidence-based clinical knowledge at the point of care. Providers and healthcare organizations now have a trusted resource to inform treatment decisions, strengthen patient relationships, and improve outcomes.

Evidence-Based Decision Support Tool | Patient Focused ...

DISCUSSION. It is important that an evidence-based approach to nursing care be incorporated into clinical practice settings in order to improve patient outcomes. [43] In an appropriate framework, support in terms of clinical structure and organization, as well as the promotion of EBP, can be beneficial for patients.

Education and implementing evidence-based nursing practice ...

CHILDBIRTH EDUCATION CAN HELP SIMPLIFY PREGNANCY, BIRTH, AND MATERNITY CARE DECISIONS. If evidence-based maternity care is to become a reality, every pregnant woman needs to know how to have a safe, healthy birth and make decisions that reflect this knowledge. Childbirth educators, nurses, midwives, obstetricians,...
