Conservation Biology in Sub-Saharan Africa comprehensively explores the challenges and potential solutions to key conservation issues in Sub-Saharan Africa. Easy to read, this lucid and accessible textbook includes fifteen chapters that cover a full range of conservation topics, including threats to biodiversity, environmental laws, and protected areas management, as well as related topics such as sustainability, poverty, and human-wildlife conflict. This rich resource also includes a background discussion of what conservation biology is, a wide range of theoretical approaches to the subject, and concrete examples of conservation practice in specific African contexts. Strategies are outlined to protect biodiversity whilst promoting economic development in the region. Boxes covering specific themes written by scientists who live and work throughout the region are included in each chapter, together with recommended readings and suggested discussion topics. Each chapter also includes an extensive bibliography. Conservation Biology in Sub-Saharan Africa provides the most up-to-date study in the field. It is an essential resource, available on-line without charge, for undergraduate and graduate students, as well as a handy guide for professionals working to stop the rapid loss of biodiversity in Sub-Saharan Africa and elsewhere.

Serves as an index to Eric reports [microform].

“ This novel is “ faction ” at its best. The author has superbly recreated the European world of the Jewish people in the first half of the twentieth century – a world of unimaginable hardship and hatred, culminating in the Holocaust. I do not exaggerate when I say that I found this novel extremely engaging – and unsettling. For an excellent ‘ feel ’ of the European world of our forebears, and for a disturbing look at the destructive power of the Protocols of the Elders of Zion, I recommend this book most strongly. ” – Dr D.M. Scher

‘ This book is a good comprehensive text and comes highly recommended to anyone currently involved in, looking to get involved in, or just interested in environmental management, environmental accounting and reporting’ - Pacific Accounting Review This is the long-awaited 2nd edition of the benchmark publication that helped shape the developing agenda of environmental accounting. This excellent new edition provides an overview of the subject ranging from environmental management to sustainability, and integrates the major advancements that have occurred since the first edition - in both research and

practice. It introduces and explains environmental issues as they relate to accountants today. This new work also places an increased emphasis on the emerging research literature in the field and reveals a consciousness of the difficulties of developing an environmental agenda in business. It makes an excellent stand-alone text for lower level students, a firm base from which the advanced student or researcher can explore research and more complex issues, and a useful guide for practitioners seeking to understand and implement environmental practice.

This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About

Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

UK companies are governed by legal and other regulatory requirements impacting elements of financial statements that are common to users of both International Financial Reporting Standards (IFRS) and UK GAAP. These are often referred to as the 'front half' of the financial statements. This publication contains the guidance applicable to all UK companies regardless of the GAAP under which their financial statements are prepared. Key updates from the previous edition (Manual of Accounting: Management Reports and Governance 2011) include updated chapters on business review and corporate governance, with many more illustrations and examples. Written by PwC's UK Assurance Risk and Quality team, the manual includes practical advice based on PwC's work advising clients, partners, and staff. The book will be of particular interest to finance directors, accountants, legal practitioners, company administrators, financial advisors, and auditors.

Mann's Pharmacovigilance

The Parliamentary Monitor

Accounting for the Environment

Highly Commended at the BMA Medical Book Awards

2015 Mann ' s Pharmacovigilance is the definitive reference for the science of detection, assessment, understanding and prevention of the adverse effects of medicines, including vaccines and biologics.

Pharmacovigilance is increasingly important in improving drug safety for patients and reducing risk within the practice of pharmaceutical medicine. This new third edition covers the regulatory basis and the practice of pharmacovigilance and spontaneous adverse event reporting throughout the world. It examines signal detection and analysis, including the use of population-based databases and pharmacoepidemiological methodologies to proactively monitor for and assess safety signals. It includes chapters on drug safety practice in specific organ classes, special populations and special products, and new developments in the field. From an international team of expert editors and contributors, Mann ' s Pharmacovigilance is a reference for everyone working within pharmaceutical companies, contract

research organisations and medicine regulatory agencies, and for all researchers and students of pharmaceutical medicine. The book has been renamed in honor of Professor Ronald Mann, whose vision and leadership brought the first two editions into being, and who dedicated his long career to improving the safety and safe use of medicines.

Entertaining. Touching. Shocking. Sit down and buckle up as you read these true stories of the streets from a paramedic's point of view. In *Tales from my Stethoscope*, Bruna, an Advanced Life Support paramedic with more than 25 years' experience, takes you behind the scenes of accidents, sudden illness, shootings and human revelry gone wrong. You'll experience the fun and excitement of Johannesburg on a Saturday night ... but you'll also go to the lonely places where old people suffer in silence and children aren't properly cared for. You'll read about running a clinic on a mine in deepest Africa and being the resident paramedic on a geo-survey ship plying the waters around the globe. You'll fly helicopters over cities praying that the patient survives, and you'll be there in the middle of farming country helping to amputate a leg caught in a harvester. If you can stomach the drama, the blood, the grief, and the quirky humour used to get through harrowing situations, you'll get to the end of these tales with a deeper understanding of the human condition and renewed admiration and gratitude for those who listen and act when we call out in distress.

Sustainability requires companies to develop in an

economically, environmentally and socially sustainable manner. Corporate sustainable development in turn requires movement towards cleaner production. In order to recognize the potential from cleaner production – reduced costs and fewer environmental impacts through the reduced use of materials – environmental management accounting (EMA) is a necessary information management tool. Environmental Management Accounting for Cleaner Production reveals a set of tools for companies to collect, evaluate and interpret the information they need to estimate their potential to use cleaner production to realize cost savings and to make the best decisions about the available cleaner production options. EMA is therefore the key for driving environmental progress, cost savings, increased competitiveness and corporate sustainability through the means of cleaner production.

HM Customs and Excise (now part of HM Revenue and Customs) collected £ 162 billion of gross receipts in 2003-04 in value added tax (VAT) and excise and customs duties from over 1.8 million business traders. The Committee's report examines the NAO standard report on the work of the Department during 2003-04 (contained within the 95th report of the Commissioners of Her Majesty's Customs and Excise for 2003-04, published as HCP 119, session 2004-05, ISBN 0102931593 in December 2004). It makes a number of recommendations focusing on work related to the two key revenue streams of VAT (which generates £ 63.6 billion net) and hydrocarbon oils, mainly on petrol and diesel fuel (which provides £ 12.7 billion and £ 9.8 billion respectively).
