The easiest way to print out a flowchart that is larger than your printer paper is to print it onto multiple pieces of paper and then tape the pieces together. Before you start printing, however, it's important to make sure that the drawing page, as it appears in Visio, contains the entire flowchart.

Create a basic flowchart in Visio - Visio

Punched tape is another antiquated technology. A software program would be saved by noisily punching holes in a paper tape. The paper tape was about an inch wide and hundreds of feet long. The holes were large enough to see. As the minicomputer punched the tape, it would stream onto the floor.

What do the Different Flowchart Shapes Mean?

Flow Rate Selection. When selecting the flow rate for your drip tape there are 3 considerations to keep in mind. Run Length – The longer the run length you need per row of tape then the lower the flow rate per emitter is needed. The reason is that longer run lengths have more emitters and the more emitters there are the more water is being used per line.
