The Basics of Investigating Forensic Science: A Laboratory Manual is designed for the beginning forensic science student and for instructors who wish to provide a solid foundation in basic forensic science topics and laboratory techniques. Divided into five distinct sections, the book covers a broad range of subjects, including fingerprinting, shoeprint analysis, firearms, pathology,

anthropology, forensic biology, drugs, trace evidence, and more.

The Basics of Investigating Forensic Science: A Laboratory ...

For the fourth edition, the manual has been updated in line with the textbook, incorporating new methods, figures, and worksheets. Each chapter contains explanations of the terminology, osteological features, and measurements needed to understand each of the topics.
