'A landmark in the  
process of  
decolonizing imperial  
Western knowledge.'  
Walter Mignolo, Duke  
University To the  
colonized, the term  
'research' is conflated  
with European  
colonialism; the ways  
in which academic  
research has been  
implicated in the

*Page 33/97*

throes of imperialism  
remains a painful  
memory. This  
essential volume  
explores intersections  
of imperialism and  
research - specifically,  
the ways in which  
imperialism is  
embedded in  
disciplines of  
knowledge and  
tradition as 'regimes  
of truth.' Concepts

*Page 34/97*

such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has

*Page 35/97*

been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date. While indigenous

*Page 36/97*

peoples make up  
around 370 million of  
the world's population  
- some 5 per cent -  
they constitute around  
one-third of the  
world's 900 million  
extremely poor rural  
people. Every day,  
indigenous  
communities all over  
the world face issues  
of violence and  
brutality. Indigenous

*Page 37/97*

peoples are stewards of some of the most biologically diverse areas of the globe, and their biological and cultural wealth has allowed indigenous peoples to gather a wealth of traditional knowledge which is of immense value to all humankind. The publication discusses

*Page 38/97*

many of the issues addressed by the Declaration on the Rights of Indigenous Peoples and is a cooperative effort of independent experts working with the Secretariat of the Permanent Forum on Indigenous Issues. It covers poverty and well-being, culture, environment,

offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational

*Page 54/97*

enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was

*Page 55/97*

arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by

multinationals  
diffused advanced  
technologies and  
novel management  
methods, driving  
productivity growth  
in Europe, Asia and

crises and shock for  
three decades, from  
Chile to Iraq In her  
groundbreaking  
reporting, Naomi Klein  
introduced the term

*Page 81/97*

"disaster capitalism."  
Whether covering  
Baghdad after the  
U.S. occupation, Sri  
Lanka in the wake of  
the tsunami, or New

something remarkably

reeling from  
catastrophe were  
being hit again, this  
time with economic

*Page 82/97*

"shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global

*Page 83/97*

victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic

*Page 84/97*

events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of

*Page 85/97*

a radical economic project that has been incubating for fifty years.
