RAF Wings Over Florida

The autobiography every true American has been waiting for: a shockingly candid and raw confessional from a national treasure. From his humble beginnings in a desolate Iowa coal mining town, his years at Our Lady Queen of Chewbacca High School to his odds-defying climb to the dizzying heights of becoming America's most trusted and beloved television News Anchor, Ron Burgundy pulls no punches in Let Me Off at the Top! In his very own words Burgundy reveals his most private thoughts, his triumphs and his disappointments. His life reads like an adventure story complete with knock down fights, beautiful women and double-fisted excitement on every page. He has hunted jackalopes with Bobby Kennedy and Peter Lawford, had more than his share of his amorous exploits, and formed the greatest on-air team in the history of televised news. Along the way, he hobnobbed with people you wish you knew and some you honestly wish you didn't -- celebrities, presidents, presidents' wives, celebrities' wives, dogs, and, of course Veronica Corningstone, the love of his life. Walter Cronkite, Barbra Streisand, Katie Couric, the list goes on. Who didn't Mr. Burgundy, or "Ron" as he is known to his friends, rub elbows with in the course of his colorful and often criminal life? This may well be the most thrilling book ever written, by a man of great physical, moral and spiritual strength and not surprisingly a great literary talent as well. This book deserves a real shot at a Pulitzer Prize. In fact if it doesn't win one then we will finally have proof that the Pulitzer is rigged. Ron Burgundy has taken the time to write a book. We owe it to him, as honest Americans, to read it.

A sweeping novel of world war, migration, and the search for new beginnings in a new land, *The Sound of One Hand Clapping* was both critically acclaimed and a bestseller in Australia. Recognized with the Australian Booksellers' Book of the Year Award and the Vance Palmer Prize for Fiction, it now introduces to an international readership a young Australian who is emerging as one of our most talented new storytellers. In the winter of 1954, in a construction camp for a hydroelectric dam in the remote Tasmanian highlands, when Sonja Buloh was three years old and her migrant Slovenian father was drunk, her mother Maria walked off into a blizzard, never to return. Thirty-five years later, Sonja returns to Tasmania and a father haunted by memories of the European war and other, more recent horrors. As the shadows of the past begin to intrude ever more forcefully into the present, Sonja's empty life and her father's living death are to change forever. *The Sound of One Hand Clapping* is about the barbarism of an old world left behind, about the harshness of a new country, and the destiny of those in a land beyond hope who seek to redeem themselves through love.

The Official Guide to Seasons One & Two

Kids Living and Learning with New Media

The Berlin Boxing Club

The critically acclaimed Fringe television series explores the dramatic and grotesque as impossible crimes are investigated by the government's shadowy Fringe Division, established when Special Agent Olivia Dunham enlisted institutionalized "fringe" scientist Walter Bishop and his globe-trotting son, Peter, to help in investigations that defy all human logic - and the laws of nature. Author Christa Faust (*Choke Hold*, *Supernatural*) is working hand-in-hand with the television writers to create new adventures uncovering the secrets of the series. The first novel revealed how Walter Bishop and William Bell discovered the drug Cortexiphan--and the alternate universe! Book two will explore how Olivia Dunham first was subjected to Cortexiphan experiments, with catastrophic results. Faust has been given unprecedented access to stories that have not been told on-screen, but weave directly into the series canon, much as Joss Whedon's Buffy graphic novels continue that series' official storyline. Into the Looking Glass, an analytical guide for Fringe viewers and science fiction fans in general, explores the influence of these traditions on Fringe. It also reveals how the show reflects - and sometimes critiques - the society from which it emerges. Along with many other post-9/11 television shows, Fringe has demonstrated the West's collective paranoia about foreign invaders and domestic corruption. It also lays bare the spread of radical advances in technology and urges its viewers to ponder the ethical limitations of science.

Before Palm Pilots and iPods, PCs and laptops, the term "computer" referred to the people who did scientific calculations by hand. These workers were neither calculating geniuses nor idiot savants but knowledgeable people who, in other circumstances, might have become scientists in their own right. When Computers Were Human represents the first in-depth account of this little-known, 200-year epoch in the history of science and technology. Beginning with the story of his own grandmother, who was trained as a human computer, David Alan Grier provides a poignant introduction to the wider world of women and men who did the hard computational labor of science. His grandmother's casual remark, "I wish I'd used my calculus," hinted at a career deferred and an education forgotten, a secret life unappreciated; like many highly educated women of her generation, she studied to become a human computer because nothing else would offer her a place in the scientific world. The book begins with the return of Halley's comet in 1758 and the effort of three French astronomers to compute its orbit. It ends four cycles later, with a UNIVAC electronic computer projecting the 1986 orbit. In between, Grier tells us about the surveyors of the French Revolution, describes the calculating machines of Charles Babbage, and guides the reader through the Great Depression to marvel at the giant computing room of the Works Progress Administration. When Computers Were Human is the sad but lyrical story of workers who gladly did the hard labor of research calculation in the hope that they might be part of the scientific community. In the end, they were rewarded by a new electronic machine that took the place and the name of those who were, once, the computers.

Sydney Taylor Award-winning novel *Berlin Boxing Club* is loosely inspired by the true story of boxer Max Schmeling's experiences following Kristallnacht. Publishers Weekly called it "a masterful historical novel" in a starred review. Karl Stern has never thought of himself as a Jew; after all, he's never even been in a synagogue. But the bullies at his school in Nazi-era Berlin don't care that Karl's family doesn't practice religion. Demoralized by their attacks against a heritage he doesn't accept as his own, Karl longs to prove his worth. Then Max Schmeling, champion boxer and German hero, makes a deal with Karl's father to give Karl boxing lessons. A skilled cartoonist, Karl has never had an interest in boxing, but now it seems like the perfect chance to reinvent himself. But when Nazi violence against Jews escalates, Karl must take on a new role: family protector. And as Max's fame forces him to associate with Nazi elites, Karl begins to wonder where his hero's sympathies truly lie. Can Karl balance his boxing dreams with his obligation to keep his family out of harm's way? Includes an author's note and sources page detailing the factual inspirations behind the novel.

They fondly remember the times when they buzzed over the homes of their Florida "families" to let them know to expect them for Sunday dinner. More than fifty years later, their stories still resonate with universal emotions: fear of failure, love of country, camaraderie, romantic love, and the pain of tragic deaths. Their stories also remind the American reader of a unique time in our history, when, poised on the brink of war, the United States reached out to help a country in distress."--BOOK JACKET.

My Life as an Author

When Computers Were Human

The tenth-anniversary edition of a foundational text in digital media and learning, examining new media practices that range from podcasting to online romantic breakups. Hanging Out, Messing Around, and Geeking Out, first published in 2009, has become a foundational text in the field of digital media and learning. Reporting on an ambitious three-year ethnographic investigation into how young people live and learn with new media in varied settings—at home, in after-school programs, and in online spaces—it presents a flexible and useful framework for understanding the ways that young people engage with and through online platforms: hanging out, messing around, and geeking out, otherwise known as HOMAGO. Integrating twenty-three case studies—which include Harry Potter podcasting, video-game playing, music sharing, and online romantic breakups—in a unique collaborative authorship style, Hanging Out, Messing Around, and Geeking Out combines in-depth descriptions of specific group dynamics with conceptual analysis. Since its original publication, digital learning labs in libraries and museums around the country have been designed around the HOMAGO mode and educators have created HOMAGO guidebooks and toolkits. This tenth-anniversary edition features a new introduction by Mizuko Ito and Heather Horst that discusses how digital youth culture evolved in the intervening decade, and looks at how HOMAGO has been put into practice. This book was written as a collaborative effort by members of the Digital Youth Project, a three-year research effort funded by the John D. and Catherine T. MacArthur Foundation and conducted at the University of California, Berkeley, and the University of Southern California.
