

From Individual Learning To Organizational Learning

Two of the most noteworthy contributors to the field of organizational learning theory have been Chris Argyris and Donald Schon. Organizational learning (OL), according to Argyris & Schon is a product of organizational inquiry. This means that whenever expected outcome differs from actual outcome, an individual (or group) will engage in inquiry to understand and, if necessary, solve this ...

A learning organization has been described as the sum of individual learning, but there must be mechanisms for individual learning to be transferred into organizational learning. Personal mastery makes possible many positive outcomes such as individual performance, self-efficacy, self-motivation, sense of responsibility, commitment, patience and focus on relevant matters as well as work-life balance and well-being.
