The NLRP3 inflammasome plays a crucial role in innate immune-mediated inflammation and contributes to the pathogenesis of multiple autoinflammatory, metabolic and neurodegenerative diseases, but ...

RRx-001 ameliorates inflammatory diseases by acting as a potent covalent NLRP3 inhibitor

In addition to the classical clathrin-dependent mechanisms of endocytosis, there are several pathways that do not use a clathrin coat and are, therefore, referred to as clathrin-independent (CI ...
