

Geometry Problems Solutions

These geometry problems are presented here to help you think and learn how to solve problems. Do not give up quickly if a problem is a challenging one. Spend time solving

Page 1/82

geometry-problems-solutions

these problems and work in groups if possible as group work encourages you to discuss ideas and learn from each other. We learn by solving problems that we do not know how solve at first.

Problems in Geometry (9th grade) 1. The measure of a regular

Page 2/82

polygon ' s interior angle is four times bigger than the measure of its external angle. How many sides does the polygon have?

Solution to Problem 1 .

2. How many sides does a convex polygon have if all its external angles are obtuse?

Solution to Problem 2.

3.

Page 3/82

Math Worksheets How to solve geometry word problems that involve geometric figures and angles described in words? You would need to be familiar with the formulas in geometry. Making a sketch of the geometric figure is often helpful.
