## *Center for Teaching & Learning*

You have to provide a `uvm_sequence_item` object or a sequence and internally, it will do the following: create the item if necessary using ``uvm_create`. If you

don't want it to create an item, use ``uvm_send`. randomize the item or sequence. call the `start_item ()` and `finish_item ()` if its a `uvm_sequence_item` object.

Guide to getting started with Mendeley citation software.

*Page 94/98*

Mendeley is a desktop and web-based software that is used to manage and share research papers, discover research data, and collaborate online. Import documents and research papers into a library, annotate PDFs, organize with folders, and share or collaborate with other
