Teaching Rebooted uncovers the most important pieces of educational research on the science of learning, helping teachers to understand how we learn and retain information. Jon Tait explores strategies such as metacognition, interleaving, dual coding and retrieval practice, examining the evidence behind each approach and providing practical ideas to embed them in classroom practice. This pick-up-and-go manual highlights some of the classroom fads that have come and gone to allow readers to reflect on their practice and decision-making. It offers practical tips to help teachers change what they are doing in the classroom straightaway, bridging the gap between academic research and day-to-day practice for teachers at any stage of their career. Written by an experienced senior leader responsible for teaching and learning, school improvement, professional development and educational research, this guide will help reboot teaching so it is both evidence informed and effective.

This book arises from the author's experience of the South African science curriculum development and teaching since 1994, exploring definitions of science and approaches to science education appropriate to a newly liberated developing country. Each of the 50 chapters is borne out of Cliff Malcolm's close relationships with communities in SA where he obtained deep insights into their attitudes to science teaching and learning, providing him with an empirical basis to challenge tertiary institutions to transform their curriculum offerings to embrace the culture and world views of African students.
