

Grafare In Notturna O Con Luce Tenue

This book focuses on avant-garde literature and art in Europe and America during the first quarter of the twentieth century. It examines five movements that shaped our response to the demands of the modern age and contributed to the creation of a modern sensibility: Cubism, Futurism, the Metaphysical School, Dada, and Surrealism. Each of these arose in response to recent scientific, technological, and/or philosophical developments that drastically affected modern civilization. In turn, each was responsible for a major paradigm shift

Page 1/24

that altered the way in which we view—and respond to--the world around us. The final chapter is comparative in nature and studies the role of the mannequin in literature and art during the same period.

I paesi del Veneto orientale sono la nostra memoria attiva e divertente, nonch   la risorsa a cui attingere quando bisogna ritrovare equilibrio, valori e significati del vivere, forza. Forse questo ci ha spinti creare il libro, parlare con le immagini, con le persone che hanno caratterizzato la nostra infanzia; ricordi che riconducono a valori, ad un senso del vivere in cui la natura, le persone, le citt   e i paesi

avevano un significato. “ Sfogliare questo libro è come fare un viaggio grazie alle immagini straordinarie contenute in esso. Un viaggio in cui il legame con il territorio non viene mai meno, cosicché il nostro Veneto diventa l'angolo di visuale privilegiato per uno sguardo sul mondo aperto ma non sradicato ” . (Luca Zaia, presidente Regione Veneto). Un libro innovativo per l'uso dei codici QR. Grazie a questa applicazione il libro si amplifica ed entra nella vita reale di tutti i protagonisti che nel libro si raccontano. Testo ideale anche per la scuola, grazie all'aderenza alla memoria, e all'innovazione informatica.

Featuring essays by top scholars and interviews with acclaimed directors, this book examines Italian women's authorship in film and their visions of reality. The contributors use feminist film criticism in the analysis of their works and give direct voices to the artists who are constantly excluded by the conventional Italian film criticism.

No other source gives such an intimate portrait of this brilliant and strong minded individual, one of the four great doctors of the West and generally regarded as the most learned of the Latin fathers.

Over the last few decades, the prison populations in European countries have grown and their profiles have changed. There are more than 100,000 foreign prisoners in European countries. Their numbers vary greatly from country to country, but the average percentage of foreigners in the total European prison population is over 20%. Why are foreigners over-represented in European prison populations? Who are they and on what grounds are they held in detention? Are foreign prisoners more vulnerable

due to language difficulties, cultural differences, and their distance from relatives? Are they being socially excluded? Is their treatment and legal position different from other prisoners? And, how are national prison systems and other authorities addressing this issue? Funded by the European Commission, this extensive study - developed within the framework of the EU program "Social Exclusion" - offers an answer to the questions stated above. With this, a distinction is made between foreigners who are detained for committing a crime - or are suspected of one - and foreigners whose deprivation of liberty is based on migration law. Originally published as a two volume set in 2007, this comprehensive

single volume reprint contains country reports of twenty-five EU Member States, as well as six reports of organizations which contributed to the research. The first chapter presents a comparative overview with conclusions and recommendations. At the end, a detailed bibliography will be given which includes relevant websites and legal documents.

Vital Subjects: Race and Biopolitics in Italy is an interdisciplinary study of how racial and colonial discourses shaped the “ making ” of Italians as modern political subjects in the years between its administrative unification (1861-1870) and the end of the First World War (1919).

Steps forward in mathematics often reverberate in other scientific disciplines, and give rise to innovative conceptual developments or find surprising technological applications. This volume brings to the forefront some of the proponents of the mathematics of the twentieth century, who have put at our disposal new and powerful instruments for investigating the reality around us. The portraits present people who have impressive charisma and wide-ranging cultural interests, who

are passionate about defending the importance of their own research, are sensitive to beauty, and attentive to the social and political problems of their times. What we have sought to document is mathematics ' central position in the culture of our day. Space has been made not only for the great mathematicians but also for literary texts, including contributions by two apparent interlopers, Robert Musil and Raymond Queneau, for whom mathematical concepts represented a valuable tool for resolving the struggle between ' soul and precision. '

Journey through the countryside in this magical realist debut from an underground Chinese cartoonist In *Night Bus*, a young woman wearing round glasses finds herself on an

adventurous late night bus ride that constantly makes detours through increasingly fantastical landscapes. Meanwhile a young cartoonist returns home after art school and tries his hand at becoming a working artist while watching over his aging grandmother whose memory is deteriorating. Nostalgic leaps take us to an elementary school gymnasium that slowly morphs into a swamp and is raided by a giant catfish. Beetles, salamanders, and bug-eyed fish intrude upon the bus ride of the round-glasses woman as the night stretches on. Night Bus blends autobiography, horror, and fantasy into a vibrantly detailed surreal world that shows a distinct talent surveying his past. Nature infringes upon the man-made world via gigantism and explosive abundance – the images in Night Bus are often

unsettling, not aimed to horrify, but to upset the balance of modern life. Zuo Ma is part of a burgeoning Chinese art comics scene that pushes emotion to the forefront of the story while playing with action and dreams.

Cultural Perspectives from Unification to Contemporary Italy

In Roads to Health, G. Geltner

demonstrates that urban dwellers in medieval Italy had a keen sense of the dangers to their health posed by conditions of overcrowding, shortages of food and clean water, air pollution, and the improper disposal of human and animal waste. He consults scientific, narrative, and normative sources that detailed and consistently denounced the physical and environmental hazards urban communities faced: latrines improperly installed and sewers

blocked; animals left to roam free and carcasses left rotting on public byways; and thoroughfares congested by artisanal and commercial activities that impeded circulation, polluted waterways, and raised miasmas. However, as Geltner shows, numerous administrative records also offer ample evidence of the concrete measures cities took to ameliorate unhealthy conditions. Toiling on the frontlines were public functionaries generally

known as viarii, or "road-masters," appointed to maintain their community's infrastructures and police pertinent human and animal behavior. Operating on a parallel track were the camparii, or "field-masters," charged with protecting the city's hinterlands and thereby the quality of what would reach urban markets, taverns, ovens, and mills. Roads to Health provides a critical overview of the mandates and activities of the viarii and camparii

as enforcers of preventive health and safety policies between roughly 1250 and 1500, and offers three extended case studies, for Lucca, Bologna, and the smaller Piedmont town of Pinerolo. In telling their stories, Geltner contends that preventive health practices, while scientifically informed, emerged neither solely from a centralized regime nor as a reaction to the onset of the Black Death. Instead, they were typically negotiated by

diverse stakeholders, including neighborhood residents, officials, artisans, and clergymen, and fostered throughout the centuries by a steady concern for people's greater health. This book sheds new light on the role of the military in Italian society and culture during war and peacetime by bringing together a whole host of contributors across the interdisciplinary spectrum of Italian Studies. Divided into five thematic

units, this volume examines the continuous and multifaceted impact of the military on modern and contemporary Italy. The Italian context offers a particularly fertile ground for studying the cultural impact of the military because the institution was used not only for defensive/offensive purposes, but also to unify the country and to spread ideas of socio-cultural and technological development across its diverse population.

Tuscany is a landscape whose cultural construction is complicated and multi-layered. It is this very complexity that this book seeks to untangle. By

Page 21/24

revealing hidden histories, we learn how food, landscape and architecture are intertwined, as well as the extent to which Italian design and contemporary consumption patterns form a legacy that draws upon the Romantic longings of a century before. In the process, this book reveals the extent to which Tuscany has been constructed by Anglos – and what has been distorted, idealized and even overlooked in the process.
