Key Concepts: Terms in this set (17) ...  
Based on the graph, elevated levels of which hormone(s) most likely stimulate the LH/FSH surge just before ovulation? estrogen. The levels of

*Page 99/123*

*graphing-hormone-levels-answer-key*

pituitary hormones never increase above 10 grams/L of blood. Cannot be determined from the graph.

Cycle Graphing Lab Answer

KeyProcedure: Part One (Graphing):

1. Graph the data. a. Plot all four points in different colors and include a

key identifying each plot. b. Using any extra information at your disposal, draw a fifth line indicating the thickness of the endometrial lining during the menstrual cycle (feel free to put your units for this

4. Progesterone and estrogen will suppress the secretion of LH and FSH in anterior pituitary gland. So on the graph you can notice lower levels of these 2 hormones. They do this bc we want to prevent ovulation of multiple eggs.

Graphing Lab Answers (Graphing): 1.  
Graph the data. a. Plot all four points in
