The companion book to an upcoming museum exhibition of the same name, Places of Invention seeks to answer timely questions about the nature of invention and innovation: What is it about some places that sparks invention and innovation? Is it simply being at the right place at

Page 8/52

the right time, or is it more than that? How does “ place ” —whether physical, social, or cultural—support, constrain, and shape innovation? Why does invention flourish in one spot but struggle in another, even very similar location? In short: Why there? Why then?

Places of Invention

Page 9/52

frames current and historic conversation on the relationship between place and creativity, citing extensive scholarship in the area and two decades of investigation and study from the National Museum of American History ' s Lemelson Center for the Study of Invention and Innovation. The book is

Page 10/52

built around six place
case studies: Hartford,
CT, late 1800s;
Hollywood, CA, 1930s;
Medical Alley, MN,
1950s; Bronx, NY, 1970s;
Silicon Valley, CA,
1970s – 1980s; and Fort
Collins, CO, 2010s.
Interspersed with these
case studies are
dispatches from three
“ learning labs ”
detailing Smithsonian

Page 11/52

Affiliate museums ' work using Places of Invention as a model for documenting local invention and innovation. Written by exhibition curators, each part of the book focuses on the central thesis that invention is everywhere and fueled by unique combinations of creative people, ready resources, and inspiring

Page 12/52

surroundings. Like the locations it explores, *Places of Invention* shows how the history of invention can be a transformative lens for understanding local history and cultivating creativity on scales of place ranging from the personal to the national and beyond.

A lost classic by beloved
novelist Joseph
Heywood that helped
put the writer on the
map, THE BERKUT
begins at dusk as SS
Colonel Gunter Brumm
parachutes silently
through the sulphuric
haze in the smoldering
ruins of Berlin, past the

Page 28/52

Soviet troops that encircle the skeleton that the city has become in April 1945. With the precision and skill that has marked his brilliant military career, Brumm has completed the first stage of a simple yet seemingly impossible mission: to evade the Allied forces swarming over Europe and to smuggle "Herr Wolf,"

Page 29/52

the greatest war criminal of the twentieth century, to safety. Less than twenty-four hours later a special Russian team snakes its way into Berlin's city limits, headed for the Reich Chancellery. It is led by Vasily Petrov, "the Berkut"—named after the Russian eagles trained to hunt wolves, a man handpicked by

Page 30/52

Stalin himself for his ability to track down his quarry and driven by the knowledge that failure means certain death. THE BERKUT is a classic story of pursuit, of hunters and the hunted, that pits two elite teams against each other—both of them brave, resourceful, of great physical prowess and so fully motivated

Page 31/52

that only the winners will survive. Scores of other characters populate this engrossing thriller: priests, deserters, partisans, Nazis on the run, Swiss guides, Austrian refugees—as well as a larger-than-life OSS operative who is the only person among the hundreds of thousands of Allied troops in

Page 32/52

Europe who realizes that Herr Wolf is not only alive but on the verge of escaping justice. Joseph Heywood's novel is a story of enormous conviction and urgency, made even more compelling for being based on facts that have yet to be proven fiction.
