Global Trade Law Series, Volume 55 India, one of the world ' s foremost trading nations, exhibits a particularly complex regulatory landscape with a variety of standard-setting bodies, regulators, accreditation and certification bodies, inspection agencies, as well as several state-level regulators. This is the first book to extensively describe the nature of standard-setting processes in India and the key agencies involved with this task, greatly clarifying the scope of market opportunities in the country. Lucid contributions from experienced practitioners and regulators with first-hand experience in formulating and advising on standards-related issues in international trade help disentangle the web of laws, regulations, operations, and functions of India ' s standard setters in governmental, non-governmental, and industry contexts. The chapters describe how standards apply to such crucial trade aspects as the following: conformity assessment practice and procedure; environmental, ethical, social, and safety issues; import bans and import licensing; certification and labelling measures; mutual recognition agreements; food safety; and standardisation of the digital economy. The book is drafted throughout in an easy-to-read style, with numerous tables, flowcharts, and figures illustrating step-by-step compliance procedures. Informative annexes guide the reader to relevant agencies and identify their roles and responsibilities. This book provides a clear and concise guide to the operations, functions, and compliance and documentation requirements of India ' s standard-setting and regulatory bodies across all sectors and products, and thus will serve as an unmatched guide for manufacturers, traders, and exporters operating in the Indian market or seeking to export to India. It will also serve as a useful Handbook to policymakers, academics, and researchers interested in understanding the role of standard-setting bodies in the field of international trade.

The Medical Staff Services handbook is the most comprehensive educational resource available for medical staff services departments. More than an introductory text it covers all department functions and offers practical advice on managing the credentialing and privileging process. This indispensable book can be used as a training tool for students, new employees, and physician leaders; as an on-the-job reference for medical staff services professionals; and as a guide to standardizing department processes. This second edition offers new information on the professional practice evaluation process. It addresses healthcare accreditation programs and hospital functions such as the institutional review board, cancer programs, and accredited continuing medical education programs. Helpful guidance on healthcare technology and legal issues is also included. Students who will be taking the NAMSS exam will find this handbook an ideal preparation tool.

This book provides a comprehensive overview of universal health coverage in India. It starts by setting the historical context and politics of the debates around universal health coverage (UHC) in India and proceeds to analyze the present crisis of public health in the country. The book examines the present policies on the pharmaceutical industry, missing links in universalizing health, and the importance of social determinants of health. It is divided into five sections, and some of the topics covered include the difference between comprehensive primary health care and universal health care, public health and medical care, health service, and health system. The chapters are contributed by scholars and practitioners based on historical, interdisciplinary, empirical, and policy research. The book is insightful to academics, public health administrators, policymakers, practitioners, and students interested in health care and organization, looking to transform theory into policy and practice.

It was a long-time desire of nursing fraternity to have a textbook on nursing education that has the content for all the units of the INC-prescribed syllabus. This book pointedly deals with all the contents specified by the INC curriculum. The book has been written keeping in mind the requirements of the modern Indian nurse educators—what they need to know and practice in the classroom.

This book provides comprehensive study material and practice exercises on Nursing Education the way it is used in day-to-day conversations in the hospital environment. • Comprehensive, exhaustive and well-structured coverage • Lucid presentation with easy language for ease of comprehension • Practical approach with relevant theoretical perspectives answering common questions and issues that arise while learning the subject • Ample number of examples, tables and other learning aids • All the essential elements of communication in modern-day nursing practice like nursing reports, records, etc., discussed, analysed and exemplified • Examples from real-life health care communications provided • Exhaustive end-of-chapter exercises • Solutions for all objective type exercises given

Changes within the travel industry, such as globalization, consumerism, and advancements in technology, have transformed travel agencies into highly competitive businesses. To remain successful, new business approaches and models must be created in the global tourism and hospitality industry. Travel companies continue to expand their businesses in different countries and seek to collaborate with international entrepreneurs, developing the need for cross-cultural strategies and policies. As travel agencies flourish, identifying these business practices is necessary for these organizations to obtain a competitive management model at the global level. The Handbook of Research on International Travel Agency and Tour Operation Management gathers the latest methodologies, tools, models, and theories regarding tourism development and sustainability into one comprehensive reference source in order to promote, manage, and maximize the profitability potential of travel agencies and tour operation services. Featuring research on topics such as e-marketing, medical tourism, and online travel, this book provides travel agents, managers, industry professionals, researchers, academics, and students with the necessary resources to effectively develop and implement organizational strategies and models.

"Best Practices Guidelines and Toolkit on Engaging the Private Sector in Skills Development " , jointly developed by UNDP IICPSD and Statistical, Economic and Social Research and Training Centre for Islamic Countries(SESRIC), will inspire, motivate and mobilize the private sector for its active engagement in skills training for employment. The guidelines and toolkit will help stakeholders to collaborate more closely with companies, chambers of commerce and business associations. It outlines how the private sector could contribute to the employability of individuals through providing labour market signals, improving technical and practical skills acquisition, integrating industry know-how and expertise to every step of the trainings and help link skills to placement opportunities. These will ensure that disadvantaged youth, women and other marginalized groups are ready to enter the labour force with possessing the right skills they need to thrive. The 2030 Agenda for Sustainable Development highlights the importance of skills and lifelong learning not only to make individuals competitive in the labour market but also to empower people. Sustainable Development Goal (SDG) 4 reminds us that inclusive, quality education is critical for human development. SDG 8 reminds us that decent work and economic growth can only be achieved through productive capacities. The relationship between skills and employability is fundamental to the success of the SDGs — from eradicating poverty to achieving gender equality to empowering women and girls. Bridging the skills mismatch for greater employability will be a huge leap forward in achieving the SDGs. This publication guarantees to guide all stakeholders in the direction of improving the existing skills and reducing the skills mismatch for greater employability of the target groups. The Guidelines and Toolkit will complement existing UNDP work on sustainable employment and inclusive growth and augments the related efforts of other international organizations.

This book has all non-clinical chapters, as for all clinical chapters I will be publishing the second book soon. These standards should be used by all healthcare service leaders in hospital commissioning, operations, quality improvement, patient safety and risk management.

From Care to Coverage

This book analyzes the historical development and current state of India's healthcare industry. It describes three sets of institutions that deliver healthcare services, finance these services, and manufacture products used in these services. These institutions provide healthcare (hospitals, physicians, pharmacies, and diagnostic laboratories), pay for healthcare (individuals who pay out-of-pocket, insurance companies, community insurance schemes, government ministries) and produce the technology used in healthcare delivery (pharmaceuticals, biotechnology, and medical devices). The volume also discusses innovative efforts to raise capital for the development of these sectors. Finally, it includes three interesting case studies of innovative models of healthcare delivery (L. V. Prasad, Aravind, and Vaatsalya), as well as analyses of other innovative organizations like Narayana Hrudaylaya and the hospital chains. The contributors to the volume include Wharton faculty members, graduates of Wharton's healthcare MBA program, and executives and consultants from India.

"Provides in-depth design recommendations and proven, cost effective, and reliable solutions for health care HVAC design that provide low maintenance cost and high reliability based on best practices from consulting and hospital engineers with decades of experience in the design, construction, and operation of health care facilities"--

India started its economic reforms in 1991 and has seen huge incremental bene?ts – greater openness, higher growth and substantial poverty reduction. India is now the world's sixth largest economy and has seen major transformation in many parts of the economy and the country. But with new opportunities have come new challenges which are now being tackled. Seminal reforms such as GST and IBC are transforming the economic landscape of the country. India's infrastructure de?cit is being addressed at a faster pace and the ease of doing business is being tackled on a war footing with India's global rankings showing huge improvements. But yet more needs to be done as the aspirations of India's young population are huge. India is also in the midst of a huge demographic transformation which if taken advantage of can propel India to even higher levels of growth. The bene?ts of India's demographic dividend and a huge domestic market puts it in an advantageous position to become a \$9 - 10 trillion economy by 2030. However, our economic growth is contingent on improving competitiveness, attracting more investment, creating enough employment opportunities to absorb the growing population and overcoming the challenges of exclusion and inequitable access due to multiple deprivations of class, caste and gender — all of which require disruptive approaches to ?nd solutions. Unfortunately, there is no single silver bullet, no one action that will ?x all the problems that we face currently. Rather, we need to act on several fronts. The Modi's Vision 2030" was initiated with a view to chart out an agenda of reforms and programmes in 10 inter-connected areas that will help drive India to its goals of shared prosperity by 2030 and a more competitive economy rising to become the third largest in the world. This report, encompassing ten underpinning chapters, identi?es the challenges of tomorrow, points to key choices ahead, and recommends not just “what” needs to be reformed, but “how” to undertake the reforms. Policy consistency and coordination is essential if we are to achieve inclusive growth and signi?cantly reduce unemployment. Productivity and investment-led transformation can inject new dynamism into the economy and ensure future growth, employment, and prosperity. This would enable the economy to gain the momentum it needs to become the global economic centre and become a magnet for investments. In the last 91 years, FICCI has played an active role in the progress and development of the Indian economy, representing not just the voice of industry but also being an active partner in the development agenda of the government. By 2030, India should transcend a new era of transformation and FICCI will continue to contribute to the building of a “New India”. We are con?dent that you will ?nd this report insightful and engaging and look forward to your feedback and suggestions.

This book describes the significance of metrology for inclusive growth in India and explains its application in the areas of physical–mechanical engineering, electrical and electronics, Indian standard time measurements, electromagnetic radiation, environment, biomedical, materials and Bhartiya Nirdeshak Dravyas (BND®). Using the framework of “Aswal Model”, it connects the metrology, in association with accreditation and standards, to the areas of science and technology, government and regulatory agencies, civil society and media, and various other industries. It presents critical analyses of the contributions made by CSIR-National Physical Laboratory (CSIR-NPL), India, through its world-class science and apex measurement facilities of international equivalence in the areas of industrial growth, strategic sector growth, environmental protection, cybersecurity, sustainable energy, affordable health, international trade, policy-making, etc. The book will be useful for science and engineering students, researchers, policymakers and entrepreneurs.

The prevention and control of infection in healthcare environments is now more important than ever. From simple hand washing to full PPE (personal protective equipment), hygiene maintenance has never been more at the forefront of people ' s minds than during the Coronavirus COVID-19 outbreak. This book is a practical guide to the prevention and control of healthcare and laboratory-associated infections. Divided into twelve sections, the text begins with an introduction to the basic science of infection and the use of antimicrobial agents. The following sections cover prevention and control of infection in different environments and situations including hospitals, laboratories, specific patient groups, and high risk and procedure areas. Different infection transmission methods are discussed in depth. The book concludes with guidance on standards and sample protocols, and training techniques. The comprehensive text is further enhanced by images and flow charts, and each chapter includes MCQs (multiple choice questions) to assist learning and revision. Key points Comprehensive guide to prevention and control of infection in healthcare environments Covers different environments, patient groups and infection transmission methods Features images and flow charts to assist learning Each chapter concludes with MCQs on the topic

' Dermatological Emergencies ' aims to cover aspects of situations and their management when they present in a Dermatology setup. This includes severe drug reactions, bullous disorders, erythroderma, infections, vasculitis and systemic emergencies presenting with skin signs. This book guides the reader to recognize such emergencies, helps to approach the initial phase of management, identifies the investigations, thus leading to a holistic management of the scene. Case scenarios are used in all chapters with logical flow of text, flowcharts, algorithms and representative clinical and laboratory images for better understanding of the readers. Key Features Details all dermatological emergencies Discusses manifestation of these emergencies with unique algorithms and flowcharts Examines case scenarios for first-hand experience Consists of Do's and Don'ts for effective management of cases Uses high quality clinical images for clarity This manual is aimed at helping medical record workers in the development and management of medical records services of health care facilities in developing countries in an effective and efficient manner. It has not been designed as an introductory text to medical record management, but rather as an aid to medical record officers (MROs) and medical record clerks by describing appropriate systems for Medical Records Departments in developing countries. It covers manual procedures and may be used as an adjunct to computerized systems. It does not provide all of the options for medical record management, but it does provide one option in each area for the management of medical records in developing countries. A list the textbooks that provide detailed information on medical record management is also provided.

The WHO benchmarks for the practice of Unani medicine defines the minimum requirement/criteria for establishing practice in Unani medicine in WHO Member States, by providing minimum reference standards for safety and quality of Unani medicine practice. This document provides WHO Member States with the general and minimum technical requirements for quality assurance and regulation of Unani medicine practice. It is aligned with the objectives of the WHO Traditional Medicine Strategy 2014-23, and reflects the consensus reached through established WHO processes from the community of practitioners in Unani medicine, health service providers, academics, health system managers and regulators. It provides information and describes levels of practice in Unani medicine, presents the different categories of Unani health service providers, describes the requirements for infrastructure and facilities, as well as relevant requirements and considerations in the practice of Unani health interventions, of the health products and medical devices used in Unani medicine practice, emphasizing the key elements for the safe practice of Unani medicine. It also presents the requirements and relevant considerations of regulatory, legal and ethical aspects of Unani medicine practice, and suggests the process for management of related health data.

Implementing safety practices in healthcare saves lives and improves the quality of care: it is therefore vital to apply good clinical practices, such as the WHO surgical checklist, to adopt the most appropriate measures for the prevention of assistance-related risks, and to identify the potential ones using tools such as reporting & learning systems. The culture of safety in the care environment and of human factors influencing it should be developed from the beginning of medical studies and in the first years of professional practice, in order to have the maximum impact on clinicians' and nurses' behavior. Medical errors tend to vary with the level of proficiency and experience, and this must be taken into account in adverse events prevention. Human factors assume a decisive importance in resilient organizations, and an understanding of risk control and containment is fundamental for all medical and surgical specialties. This open access book offers recommendations and examples of how to improve patient safety by changing practices, introducing organizational and technological innovations, and creating effective, patient-centered, timely, efficient, and equitable care systems, in order to spread the quality and patient safety culture among the new generation of healthcare professionals, and is intended for residents and young professionals in different clinical specialties.

Every Medical Facility Tries To Provide Best Possible Services To Its Customers. Standard Operating Procedures (Sop) Of Various Departments Together Constitute A Hospital Manual Which Significantly Determines The Performance Of A Hospital In Practical Terms. Thus, Every Hospital Must Prepare Sop In A Way That It Ensures Consistency In Working Of Varied Departments On The One Hand And Enables To Obtain Best Results In A Cost-Effective Manner On The Other.The Present Book Will Prove A Useful Aid In Preparing Sops. It Is Written Keeping In Mind The Problems Usually Faced By Middle And Small Size Hospitals During The First Few Years Of Their Operation. It Not Only Lays Down The Basic Duties And Responsibilities Of Staff Members, Procedures And Policies But Also Provides Many Sample Stationery Formats Applicable To Various Departments. The Standards Laid Down Here Are Most Common And Easy To Adopt By Hospitals Owing To Their Flexibility Which Enables Their Modification So As To Suit One S Needs, Be It Any Department Opd, Ipd, Emergency, Investigation, Administrative, Accounts, Etc.This Book Will Be Particularly Beneficial To All Such Persons Who Are Involved In Managing Middle And Small Sized Hospitals And Lack In Sufficient Experience In Handling Day-To-Day Performance. While For The Established Hospitals The Book Would Serve As A Valuable Guide In The Management Of Affairs Of Their Various Departments In A Rather More Efficient And Cost-Effective Manner. In Addition, It Is Useful For The Students Of Mha, Dha And Mba (Ha).

"It's critical that the quality of Dental Healthcare is top notch, but it's equally important that care be delivered in ways that are sensitive for individual, family & cultural needs and delivered with human touch" This book is guaranteed to help you to take your dental practice to the next level by guiding you through the various simple yet effective policies and protocols in your day-to-day dental practice. Innovations in Maternal Health presents a compilation of twenty-three innovations from the area of Maternal and Newborn Health. These innovations have been written in the case-study style for teaching, which will be beneficial for capacity building initiatives for health-care professionals. These descriptive cases cover innovative programmes, initiatives and technologies implemented in India. Each case is complemented by a documentary film provided in the accompanying DVD. The book takes us on a boat ride through the rarely travelled riverine areas of the Majuli Islands of Assam and the Sunderbans in West Bengal to the state of Tamil Nadu, which is known for its constant endeavours to improve its health-care system, considered one of the best in the country. Technological innovations to address hypothermia in newborns and buy time in cases of postpartum haemorrhage in low-resource settings have been documented in detail. The book hopes to encourage readers to analytically view the need for innovations, critically analyse their success and challenges and the need for information sharing for better utilization of existing knowledge.

This volume, developed by the Observatory together with OECD, provides an overall conceptual framework for understanding and applying strategies aimed at improving quality of care. Crucially, it summarizes available evidence on different quality strategies and provides recommendations for their implementation. This book is intended to help policy-makers to understand concepts of quality and to support them to evaluate single strategies and combinations of strategies.

This manual enables individuals working in children's palliative care (CPC) globally to learn through engaging real-world cases. The aim is to provide a clinical case-based resource that is globally relevant and accessible to those working in CPC. Drawing on case histories from around the world that reflect key issues and elements of CPC, it provides a practical approach grounded in experience. It addresses multidisciplinary care in the management of children and their families; discusses cases from an international perspective, and shares examples from a variety of countries, utilising cases across a range of ages and conditions, demonstrating holistic care. It represents the first case-based manual on global CPC and is endorsed and promoted by the International Children's Palliative Care Network (ICPCN). Children's palliative care is a rapidly developing field, both in the UK and internationally. The provision of CPC varies considerably, with provision often being insufficient, and over 65% of countries having no recognised CPC service provision whatsoever. As such, while there are an estimated 21.6 million children who require palliative care, in many areas of the world, CPC is poor or non-existent, and children are treated like little adults without their distinctive needs being recognised or understood. There is also a dearth of literature on CPC, hence this clinical case-based manual fills a gap in the market, and is aimed at a global audience, making it a unique text in the field.

This book aims to increase awareness about the importance of communication in health care. Written by healthcare professionals and Communication experts, it is replete with real-life scenarios that readers can identify with, and will serve as a guide to effective and efficient communication that affects the most important stakeholders in health care - The patient.

A Critical Comparative Study on the National Accreditation Standards for Hospitals of India, Australia, Denmark and South Africa The researcher has developed and submitted "The Universal Healthcare Quality Standards for General Hospitals" as one of the objective of this research along with this thesis. It will be applicable for all the general hospitals in all continents and countries of the world. Moreover, it will be a great help for NABH, WHO and ISQua to improve the NABH Standards, to develop the global standards for all the countries of the world and to standardize the ISQua accredited national standards respectively. The Universal Healthcare Quality Standards for General Hospitals will be unique in the world which will be applicable for all the general hospitals across the globe.

Healthcare Systems Management: Methodologies and Applications

Infection Prevention and Control

21st Century Perspectives of Asia

Confronted with worldwide evidence of substantial public health harm due to inadequate patient safety, the World Health Assembly (WHA) in 2002 adopted a resolution (WHA55.18) urging countries to strengthen the safety of health care and monitoring systems. The resolution also requested that WHO take a lead in setting global norms and standards and supporting country efforts in preparing patient safety policies and practices. In May 2004, the WHA approved the creation of an international alliance to improve patient safety globally; WHO Patient Safety was launched the following October. For the first time, heads of agencies, policy-makers and patient groups from around the world came together to advance attainment of the goal of "First, do no harm" and to reduce the adverse consequences of unsafe health care. The purpose of WHO Patient Safety is to facilitate patient safety policy and practice. It is concentrating its actions on focused safety campaigns called Global Patient Safety Challenges, coordinating Patients for Patient Safety, developing a standard taxonomy, designing tools for research policy and assessment, identifying solutions for patient safety, and developing reporting and learning initiatives aimed at producing 'best practice' guidelines. Together these efforts could save millions of lives by improving basic health care and halting the diversion of resources from other productive uses. The Global Patient Safety Challenge, brings together the expertise of specialists to improve the safety of care. The area chosen for the first Challenge in 2005-2006, was infection associated with health care. This campaign established simple, clear standards for hand hygiene, an educational campaign and WHO's first Guidelines on Hand Hygiene in Health Care. The problem area selected for the second Global Patient Safety Challenge, in 2007-2008, was the safety of surgical care. Preparation of these Guidelines for Safe Surgery followed the steps recommended by WHO. The groundwork for the project began in autumn 2006 and included an international consultation meeting held in January 2007 attended by experts from around the world. Following this meeting, expert working groups were created to systematically review the available scientific evidence, to write the guidelines document and to facilitate discussion among the working group members in order to formulate the recommendations. A steering group consisting of the Programme Lead, project team members and the chairs of the four working groups, signed off on the content and recommendations in the guidelines document. Nearly 100 international experts contributed to the document (see end). The guidelines were pilot tested in each of the six WHO regions--an essential part of the Challenge--to obtain local information on the resources required to comply with the recommendations and information on the feasibility, validity, reliability and cost-effectiveness of the interventions.

This book is a comprehensive guide to the monitoring of different organ systems in anaesthetics and intensive care. Divided into nine sections, the text begins with an introduction to the evolution of monitoring equipment, computerised reporting, and minimum standards. The following sections cover monitoring techniques for different systems of the body - cardiovascular, respiratory, central and peripheral nervous, musculoskeletal, metabolic, and coagulation. The final chapters discuss the monitoring of pain and related topics such as ventilator waveforms, foetal monitoring, and future technologies. The book also features discussion on research-based monitoring ideas for the future, including quantifying pain, sedation, and maternal-foetal safety management. Key points Comprehensive guide to the monitoring of organ systems in anaesthetics and intensive care In depth coverage of many different systems of the body Includes discussion on pain monitoring and future technologies Highly illustrated with clinical photographs and diagrams

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb, <http://www.ahrq.gov/qual/nursesdbk>.
