Feasibility Studies for Projects. Feasibility studies should arrive at definitive conclusions on all the basic aspects of a project after consideration of various alternatives. The document provides a basic guide to feasibility information Investors need in order to evaluate the economic viability of a development.

the need for feasibility studies. Quickly stated, a feasibility study is the initial design stage to any project or plan. As the name implies, a feasibility study is an analysis into the viability of an idea. Feasibility studies help answer the essential question, "should we proceed with the proposed idea?" The objective study may be completed

If the feasibility of the concept is proven, larger studies with well-designed trial protocols and a sound statistical basis are undertaken. Studies may also be carried out to confirm the performance and safety of changes in design or material of a device or to assess the device's performance against new clinical indications.

----- 1.2 AN OVERVIEW OF THE FEASIBILITY STUDY PROCESS The feasibility study process is outlined in Figure 1-3. The first step of the feasibility study, defining the objectives of the action and broadly developing response actions, should be performed as a refinement to project scoping during the remedial investigation and should be summarized in the final remedial investigation report.
