

Handbook Of Logic In Artificial Intelligence And Logic Programming Volume 5 Logic Programming Volume 5 Logic Programming

Handbook of Logic in Artificial Intelligence and Logic Programming. Volume 1: Logical Foundations Gabbay D.M., Hogger C.J., Robinson J.A. (eds.)

The Handbook of Logic in Artificial Intelligence and Logic Programming is a multi-author volume work covering all major areas of application of logic to AI and logic programming. Initially there will be six volumes containing a total of 43 articles, each article averaging around 75 pages in length but with.

There is a growing need for an in-depth survey of the applications of logic in AI and computer science. The Handbook of Logic in Artificial Intelligence and Logic Programming and its companion, Handbook of Logic in Computer Science, have been created in response to this need. This book is a combination of authoritative exposition, comprehensive survey, and fundamental research that explores underlying unifying themes in the various subject areas.
