When these differences occur, the lab guide will usually refer to a particular slides as being in either even or odd-numbered slide collections. Please try to look at the alternates by borrowing from your lab mates. Certain stains are much more instructive than others and different (alternate) tissues often help to explain functional changes.

Epithelial Tissue | histology

Epithelia are tissues composed of closely aggregated cells that cover most body surfaces, cavities, and tubes. These include the outer surface of the body (skin), tracts traversing the body (gastrointestinal tract), dead-end tracts that have openings at the body surface (respiratory, urinary, and genital tracts), and ducts that open into these tracts (exocrine glands).

Histology - Yale University

Histology is the study of the microscopic structure of tissue; it is through what doctors can form a proper diagnosis of some diseases and cancer. Do you know the basic on histology? If yes, take up this test and refresh your memory. All the best as you do!

The Basic Histology Quiz! - ProProfs Quiz

General tissue types, functions and characteristics: Notes, charts and quizzes: 92-120: Specific tissue types, functions and characteristics: Notes, charts and quizzes: Short Answer (8 pts.) Describe the differences between two tissues types : Labs: Constructed Response (12 pts) Prefixes, Suffixes and Root words: List using only those marked ...

Histology - Pattonville High School

Histology Guide teaches the visual art of recognizing the structure of cells and tissues and understanding how this is determined by their function. Rather than reproducing the information found in a histology textbook, a user is shown how to apply this knowledge to interpret cells and tissues as viewed through a microscope.
