"This heartfelt, witty addition to women's fiction will appeal to fans of Elizabeth Berg and Anna Quindlen." (Booklist) Georgia Waltz has things many people only dream of: a plush Manhattan apartment overlooking Central Park, a Hamptons beach house, valuable jewels and art, two bright daughters, and a husband she adores, even after decades of marriage. It's only when Ben suddenly drops dead from a massive coronary while training for the New York City Marathon that Georgia discovers her husband—a successful lawyer—has left them nearly penniless. Their wonderland was built on lies. As the family attorney accrues emptied bank accounts, Georgia must not only look for a way to support her family, she needs to face the revelation that Ben was not the perfect husband he appeared to be, just as her daughters—now ensconced back at home with secrets of their own—have to accept that they may not be returning to their lives in Paris and at Stanford subsidized by the Bank of Mom and Dad. As she uncovers a hidden resilience, Georgia's sudden midlife shift forces her to consider who she is and what she truly values. That Georgia may also find new love in the land of Spanx and stretch marks surprises everyone—most of all, her. Sally Koslow's fourth novel is deftly told through the alternating viewpoints of her remarkable female protagonists as they plumb for the grit required to reinvent their lives. Inspiring, funny, and deeply satisfying, *The Widow Waltz* explores in a profound way the bonds between mothers and daughters, belligerent siblings, skittish lovers, and bitter rivals as they discover the power of forgiveness, and healing, all while asking, "What is family, really?"

Miss Julia faces a double dose of trouble—this time right under her own roof. Miss Julia's iron will and kind heart have assured her a spot among the most beloved characters of Southern literature. In her latest adventure, Miss Julia whisks Hazel Marie off to the doctor when the latter admits she's been feeling poorly. The news floors them both: Hazel Marie is pregnant with twins. Unfortunately, she's also just sent her beau, Mr. Pickens, packing. Miss Julia needs a plan—and fast. So when Sam's house is robbed, Miss Julia declares that only J. D. Pickens, P.I., can get his things back. Playing Cupid and solving the crime might seem like a tall order but readers everywhere know that Miss Julia always delivers the goods.

The primary focus of this study is to view Eliade as not only a historian of religions but also as a theologian, a philosopher, novelist and as someone engaged in cross-cultural dialogue with other religious traditions. Besides attempting to view Eliade's work from a variety of perspectives, this study contends that the scholarly work of Eliade cannot be separated from his own personal quest for meaning.

More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we all familiar with: • Why not just look out for yourself? • Do what you want—just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In *When God Goes to Starbucks*, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today.

Web sites are an essential tool that every business must have in today ' s economy. Only 15 years ago, you could count the number of Web sites in the world with five or six digits; today there are between 15 and 30 billion active Web sites and millions more being added every day. Creating a Web site can be a great way to market a new product, promote your business plan, promote yourself, or simply share a few details about your life with the world. The cost of creating a Web site has risen right alongside the number of Web sites created though and many people are nervous about being able to utilise this revolutionary medium without breaking the bank. This book has been created for just such people, outlining for you in perfect detail everything you need to know to create a traffic attracting Web site, while spending little or no money at all.

There are countless resources available, and when you put them all together, they provide a complete toolkit that can make anyone a top notch Web site in no time flat. You will learn how to buy a domain name and host your Web site for less than \$15, with no additional fees charged to your account. You will learn how to use open source software like Wordpress, Joomla, and Mambo to create a platform on which you can build anything you want. You will learn how blogging has made Web site creation easier than ever and how sites like Squidoo, Facebook, and MySpace allow you more freedom to build traffic and draw more attention to what you are advertising at any given time. You will learn how to use common software to edit and tweak your Web sites and how to read the basic code that all Web sites are created in. In addition, an entire chapter is devoted to teaching you how to promote your Web site and draw traffic to it, without spending a dime in the process. You will learn why information is the most valuable asset on the market and how you can become an expert in a niche of your choosing, making money to cover any fees associated with your Web site. With the added resource of hours of interviews with web professionals you will learn which free resources not to use and which ones to outright avoid, as well as how to find and install open source modules and tools to enhance the look and feel of your site. You will learn where you can find copyright-free images to use on your Web sites and how to get free copy that will draw traffic and entertain your visitors. You will learn how to keep a free Web site from falling into the traps the major search engines set to stop spam and ultimately how to leverage new friends, business contacts, and interactions out of your Web site. If you are now, or have ever, considered starting your own Web site before, this book will map the way for you.

Our society is struggling with what Pope Benedict has called "profound crisis of faith that has affected many people." In response, the Holy Father has called us all to a Year of Faith from October 2012 to November 2013. We see the signs all around us: the demand for science to prove everything before we can believe it, the role of media and celebrities who deny the existence of God and denounce the role of the Church, and the esse in which we can all isolate God and faith into only one part of our life. In a follow-up to his best selling *St. Paul Bible Study* for Catholics during the year of St. Paul, Fr. Mitch Pacwa once again leads Catholics to a deeper understanding of Pope Benedict's call to action for the year. Perfect for individual or group study, this book is a wonderful guide to experiencing a conversion, growing in faith, and following Jesus Christ more closely. It shows us how to integrate every component of our life — relationships, morality, work, recreation, and all — into a meaningful whole. Make the most of Pope Benedict's Year of Faith, walking hand in hand with Fr. Pacwa as he guides you through the beauty and insights of Scripture in relationship to your everyday life.

As in the days following Skylab, solar physics came to the end of an era when the Solar Maximum Mission re-entered the earth's atmosphere in December 1989. The 1980s had been a pioneering decade not only in space- and ground-based studies of the solar atmosphere (Solar Maximum Mission, Hinotori, VLA, Big Bear, Nancay, etc.) but also in solar-terrestrial relations (ISEE, AMPTE), and solar interior neutrino and helioseismol ogy studies. The pace of development in related areas of theory (nuclear, atomic, MHD, beam-plasma) has been equally impressive. All of these raised tantalizing further questions about the structure and dynamics of the Sun as the prototypical and best observed star. This Advanced Study Institute was timed at a pivotal point between that decade and the realisation of Yokhok, Ulysses, SOHO, GRANAT,

Coronas, and new ground-based optical facilities such as LEST and GONG, so as to teach and inspire the up and coming young solar researchers of the 1990s. The topics, lecturers, and students were all chosen with this goal in mind, and the result seems to have been highly successful by all reports.

It took all of thirty seconds for two shots to bring the world of Margaret Tabasha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard.

But when Arthur learns the identity of the boys ' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.
