"Come with the pilgrims as they set out on a journey, a journey of patience to the city of Mecca." We are led on the journey of a lifetime to the city of Mecca - the pilgrimage known to Muslims as the Hajj. The pilgrims walk with heads bare and feet in sandals; they call to Allah; they kiss or point to the Black Stone, as the Prophet did. Arriving at Mecca, they surge round the Ka'aba, shave their heads and travel to Mount Arafat. Finally, though their bodies are tired and aching, their spirits are uplifted, knowing that with thousands of others they have performed the sacred pilgrimage. This is a window on to a sacred journey for Muslims the world over - beautifully described and illustrated for younger children.

Announcing A Major Break-Through In The Science Of Hair Loss And Male Pattern Baldness A radical new theory has recently been published which explains that HAIR LOSS and MALE PATTERN BALDNESS are really caused by TWO factors and not just one, as was previously thought. Stop Hair Loss and Grow New Hair with the Maliniak Method The first factor, which is the radical new element, is the third layer of the TOP of the scalp called the GALEA which becomes very "tight" in some people, disrupts ordinary blood flow to the follicles and sets in motion the sequence of events which triggers hair loss. The role of the GALEA has been debated for years, but this new theory provides the rationale for concluding that it must be involved because men only go bald in the areas where this GALEA exists and nowhere else. The second factor is still dihydrotestosterone (DHT) which this new theory now states only accumulates due to this restricted blood flow and which is still the actual "killer" of follicles, as per the conventional wisdom. Even more significantly, this theory also concludes that "dormant" follicles can in fact be revived to produce hair again contrary to everything we were previously told. The new theory is called the MALINIAK METHOD and is published by BORN AGAIN, The Alternate Science Company. More importantly, this theory also provides a simple new two-step treatment method which first relaxes the GALEA with simple massage techniques to restore proper blood flow to the top of the scalp. It then stimulates the dormant follicles to produce hair again with an electrical stimulation device which revives the use of an old established science derived from NIKOLA TESLA. It has been around for one hundred years and is still being used to this day but in other applications. It has been adopted and adapted in the MALINIAK METHOD to treat HAIR LOSS because that is one of the purposes it was used for originally. Two independent scientific studies have recently been published which confirm the validity of the TWO main premises of the MALINIAK METHOD. One of them is from the CROWN institute in Pickering, Ontario, which confirms that the GALEA is in fact involved in hair loss and male pattern baldness. It also concludes that a reduction in the oxygen going to the follicles causes DHT to be overproduced, adding another explanation for why this "tightness" of the scalp is at the root of this problem. The second study is from the University of Pennsylvania which found that certain types of STEM CELLS called "progenitor" cells are more numerous in non-bald areas and that these dormant cells can in fact be induced to become "progenitor" cells, in effect, be "revived" and induced to produce hair again, contrary to the previous knowledge and as predicted by the MALINIAK METHOD.

The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching Innovations Award—enabling graduate students and early career faculty to attend the annual ASA pre-conference teaching and learning workshop. Essentials of Social Statistics for a Diverse Society, Third Edition, is a more streamlined, less expensive version of the successful Social Statistics for a Diverse Society. As in the parent text, the Essentials version does more than introduce students to the statistical techniques used by social scientists. It is distinct for the use of real data from contemporary social issues, illustrating the interplay between social concerns and methods of inquiry, and for a strong emphasis on race, class, gender, and other statuses to show how statistics can be a tool for understanding the richness of social differences within society. With a wide range of examples and exercises taken from current events and published research, frequent illustrations, and a focus on student learning, this book continues to be an accessible and engaging resource for students. "I think this textbook is incredibly readable. It presents statistics in a manner that is easy to grasp and comprehend but is still rigorous in terms of the content covered." —Amy Lucas, University of Houston—Clear Lake A Complete Teaching & Learning Package SAGE edge FREE online resources for students that make learning easier. It's 1937, the eve of World War II. At twenty-six years old, Rezsı Lehrer leaves Munkacs, a small charming city located deep within

a remote corner of the Carpathian mountains and travels alone to the United States. War breaks out and Eastern European

borders are sealed. Rezsı's family is trapped in Czechoslovakia and the packages she sends home are returned unopened. When

the war ends, Rezsı discovers her parents, two brothers and scores of relatives perished in the Holocaust. Gypsy Music Street is

the story of one woman's endless sorrow and guilt she suffers at the loss of her family, the family she left behind "to die alone." Yet

she still yearns to return to her town, "the little Paris of the East," to see it just one more time. But after the war, countries borders

are redrawn and Mukacevo is no longer located in Czechoslovakia. It becomes completely closed off within the iron grip of the

Soviet Union and the political climate is one of Cold War. Mukacevo is off limits for travel. As the years pass, Rezsı reminisces,

sharing her longing and grief about the past with her daughter Bobbie. And when she dies an old woman, her dream unfulfilled,

Bobbie is driven by her own loss and grief to make this journey home for her mother, and for herself. Adventures in Budapest,

Ukraine and Israel make Gypsy Music Street an enthralling memoir of love and loss. Yet, it is also a story of the overwhelming joy

a daughter experiences when she travels back in time and discovers her own torn roots.

Is Saudi Arabia really a homogeneous Wahhabi dominated state? In 1932 the Al Saud family incorporated the kingdom of Hijaz,

once the cultural hub of the Arabian world, in to the kingdom of Saudi Arabia. The urban, cosmopolitan Hijazis were absorbed in to

a new state whose codes of behavior and rules were determined by the Najdis, an ascetic desert people, from whom the Al Saud

family came. But the Saudi rulers failed to fully integrate the Hijaz, which retains a distinctive identity to this day. In "Cradle of

Islam", the product of years spent in Mecca, Medina, Jeddah and Taif, Mai Yamani traces the fortunes of the distinctive and

resilient culture of the Hijazis, from the golden age of Hashemite Mecca to Saudi domination to its current resurgence. The Hijazis

today emphasise their regional heritage in religious ritual, food, dress and language as a response to the 'Najdification' of everyday

life. The Hijazi experience shows the vitality of cultural diversity in the face of political repression in the Arab world.
