

# I Choose To Live Sabine Dardenne

In 1980 seven-year-old Sabine Kuegler and her family went to live in a remote jungle area of West Papua among the recently discovered Fayu - a tribe untouched by modern civilisation. Her childhood was spent hunting, shooting poisonous spiders with arrows and chewing on pieces of bat-wing in place of gum. She also learns how brutal nature can be - and sees the effect of war and hatred on tribal peoples. After the death of her Fayu-brother, Ohri, Sabine decides to leave the jungle and, aged seventeen, she goes to a boarding school in Switzerland - a traumatic change for a girl who acts and feels like one of the Fayu. 'Fear is something I learnt here' she says. 'In the Lost Valley, with a lost tribe, I was happy. In the rest of the world it was I who was lost.' Here is Sabine Kuegler's remarkable true story of a childhood lived out in the

Indonesian jungle, and the struggle to conform to European society that followed.

In her powerful debut book, *Transformed, The Journey to Becoming*, Sabine Gedeon takes you behind the scenes of her life, delving deep into her childhood experiences and her path to finding true freedom, love, purpose, and transformation. This no holds barred account takes you on a journey as she uncovers the childhood trauma and abuse which later opened the door to a host of addictions and suicide attempts. Come along as Sabine takes you on a journey to discovery, detailing her process and triumph over adversity. You'll gain a better understanding of how to overcome traumatic life events, and courageously transform your life from the inside out! "In choosing to forgo comfort and familiarity, I learned the true cost of growth, the true cost of transformation, and the pain that comes with it. Had either

environment remained in a favorable state, I may have never found the courage to explore my new form and state of being. I may have never gained the strength I needed in my "new wings" to explore and fly into new territories. I may have even forfeited the opportunity to soar to new heights and see things from a more expansive vantage point. Now, when I see a butterfly, I still gaze at its majestic beauty, but I'm even more in awe of the process it endured to transform into its new identity."

"Once again, we have arrived at our favorite topic: fraught female friendship. This time it's young women working nights at crappy jobs in 90s London. You'll rip through this, reading through the night, as fixated on the story as Ladner's characters are fixated on each other."

—Glamour A riveting debut novel of complex female friendship and obsession, following one young woman ' s decision to abandon her

normal life and join the otherworldly, nocturnal existence of London ' s nightshift workers. RECOMMENDED BY GLAMOUR \* NYLON \* BUSTLE \* THE MILLIONS \* LIT HUB \* DEBUTIFUL \* CRIMEREADS When twenty-three-year-old Meggie meets her distant and enigmatic new coworker Sabine, she recognizes in her the person she would like to be. Meggie is immediately drawn to worldly, beautiful, and uninhibited Sabine; and when Sabine announces she ' s switching to the nightshift, Meggie impulsively decides to follow her. Giving up her daytime existence, her reliable boyfriend, and the trappings of a normal life, Meggie finds a liberating sense of freedom as she indulges her growing preoccupation with Sabine and plunges into another existence, immersing herself in the transient and uncertain world of the nightshift worker. While the city sleeps, she passes the hours at work clipping crime stories from the next day ' s newspapers.

*Page 4/70*

*i-choose-to-live-sabine-dardenne*

The liminal hours between night and day are spent haunting deserted bars and nightclubs with her eclectic coworkers and going on increasingly wild adventures with Sabine. Yet the closer she gets to Sabine, the more Sabine seems to push her away, leaving Meggie desperately trying to hold on to their intense friendship while doubting if she truly knows her friend at all. A fresh twist on the coming of age story and a dark love letter to city life, *Nightshift* explores the thin line between self-invention and self-destruction, as Meggie's sleep deprivation, drinking, and fixation with Sabine gain a momentum all their own. Vividly set in late-nineties London and framed by Meggie's present-day reflections, *Nightshift* is a captivating and moving debut that asks profound questions about who we are and if we can truly escape ourselves.

about me: 1. I ' m in a coma. 2. My husband doesn ' t love me anymore. 3. Sometimes I lie. Amber wakes up in a hospital. She can ' t move. She can ' t speak. She can ' t open her eyes. She can hear everyone around her, but they have no idea. Amber doesn ' t remember what happened, but she has a suspicion her husband had something to do with it. Alternating between her paralyzed present, the week before her accident, and a series of childhood diaries from twenty years ago, this brilliant psychological thriller asks: Is something really a lie if you believe it's the truth?

## Garden of Joy 2

This is a full-scale commentary devoted to the third book of Ovid's *Ars Amatoria*. It includes an Introduction, a revision of E. J. Kenney's Oxford text of the book, and detailed line-by-line and section-by-section commentary on the language and ideas of the text. Combining traditional philological scholarship with some of the concerns of more recent critics, both Introduction and commentary place

particular emphasis on: the language of the text; the relationship of the book to the didactic, 'erotodidactic' and elegiac traditions; Ovid's usurpation of the lena's traditional role of erotic instructor of women; the poet's handling of the controversial subjects of cosmetics and personal adornment; and the literary and political significances of Ovid's unexpected emphasis in the text of *Ars III* on restraint and 'moderation'. The book

will be of interest to all postgraduates and scholars working on Augustan poetry.

Nightshift clerk and high-functioning insomniac Jack is back to work, trying his best to keep out of trouble. But when his chain-smoking coworker discovers a mysterious radio signal revealing the guarded secrets of their town, Jack will learn that an annoying new dayshift manager is far from the worst of his problems. In this second

installment of the Gas Station saga, Jack finds himself entangled in his most harrowing adventure yet. With the newest crew of coworkers along for the ride and the resident psychopath out for his blood, our hero(?) must navigate the drama of small-town murder conspiracies, vigilante justice, and demonic summoning rituals...whether he wants to or not.

As she delves deeper into Ella's story, Elena begins to lose sight of her own identity and drift dangerously toward self-annihilation. other she does not. In one life she's a straight-A student with the perfect boyfriend, in the other she's considered a reckless delinquent. Nothing about her situation has ever changed, until the day when she discovers a glitch: the arm she breaks in one life is perfectly fine in the other. With this new knowledge, Sabine begins a series of increasingly risky experiments that bring her dangerously close to the life she's always wanted.

But if she can only have one life,

readers of Brian Greene ' s The Hidden Reality and Jim Holt ' s Why Does the World Exist?, Amanda Geffer tells the story of how she conned her way into a career as a science journalist—and wound up hanging out, talking shop, and butting heads with the world ' s most brilliant minds. At a Chinese restaurant outside of Philadelphia, a father asks his fifteen-year-old daughter a deceptively simple question: “ How would you define nothing? ” With that, the girl who once tried to fail geometry as a conscientious objector starts reading up on

*Page 17/70*

general relativity and quantum mechanics, as she and her dad embark on a life-altering quest for the answers to the universe ' s greatest mysteries. Before Amanda Geffer became an accomplished science writer, she was a twenty-one-year-old magazine assistant willing to sneak her and her father, Warren, into a conference devoted to their physics hero, John Wheeler. Posing as journalists, Amanda and Warren met Wheeler, who offered them cryptic clues to the nature of reality: The universe is a self-excited circuit, he said. And, The boundary

of a boundary is zero. Baffled, Amanda and Warren vowed to decode the phrases—and with them, the enigmas of existence. When we solve all that, they agreed, we ' ll write a book. Trespassing on Einstein ' s Lawn is that book, a memoir of the impassioned hunt that takes Amanda and her father from New York to London to Los Alamos. Along the way, they bump up against quirky science and even quirkiest personalities, including Leonard Susskind, the former Bronx plumber who invented string theory; Ed Witten, the soft-

spoken genius who coined the enigmatic M-theory; even Stephen Hawking. What they discover is extraordinary: the beginnings of a monumental paradigm shift in cosmology, from a single universe we all share to a splintered reality in which each observer has her own. Reality, the Gefters learn, is radically observer-dependent, far beyond anything of which Einstein or the founders of quantum mechanics ever dreamed—with shattering consequences for our understanding of the universe 's origin. And somehow it all ties back to that conversation, to

that Chinese restaurant, and to the true meaning of nothing. Throughout their journey, Amanda struggles to make sense of her own life—as her journalism career transforms from illusion to reality, as she searches for her voice as a writer, as she steps from a universe shared with her father to at last carve out one of her own. It ' s a paradigm shift you might call growing up. By turns hilarious, moving, irreverent, and profound, *Trespassing on Einstein ' s Lawn* weaves together story and science in remarkable ways. By the end, you

will never look at the universe the same way again. Praise for *Trespassing on Einstein's Lawn* “ Nothing quite prepared me for this book. Wow. Three mothers are on the beach when it happens: Lotte, whose children are lost; Sabine, a Zirkus seamstress with her grown daughter; and Tilli, just a girl herself, who will give birth later that day at St. Margaret ' s Home for Pregnant Girls. After the tragedy, Lotte ' s husband escapes with the Zirkus, while she loses the will to care for their surviving son. Tilli steps in, bonding with him in a way she isn ' t allowed to with her own baby, taken away at birth. Sabine, struggling to keep her childlike daughter safe in the world, forms a complicated

debut novel that will shatter your heart and piece it back together, one truth at a time. Sixteen-year-old Sabine Braxton doesn't have much in common with her identical twin, Blythe. When their father dies from an unexpected illness, each copes with the loss in her own way—Sabine by “poeting” (an uncontrollable quirk of bursting into poetry at inappropriate moments) and Blythe by obsessing over getting into MIT, their father's alma mater. Neither can offer each other much support . . . at least not until their emotionally detached mother moves them into a ramshackle Bay Area mansion owned by a stranger named Charlie. Soon, the sisters unite in a mission to

*Page 38/70*

figure out who Charlie is and why he seems to know everything about them. They make a life-changing discovery: their parents were hiding secrets about their sexual identities. The revelation unravels Sabine's world, while practical Blythe seems to take everything in stride. Once again at odds with her sister, Sabine chooses to learn all she can about the father she never knew. Ultimately, she must decide if she can embrace his last wish for a family legacy--even if it means accepting a new idea of what it means to be a family.

Growing up near the Sabine, journalist Wes Ferguson, like most East Texans, steered clear of its murky, debris-

filled waters, where alligators lived in the backwater sloughs and an occasional body was pulled from some out-of-the-way crossing. The Sabine held a reputation as a haunt for a handful of hunters and loggers, more than a few water moccasins, swarms of mosquitoes, and the occasional black bear lumbering through swamp oak and cypress knees. But when Ferguson set out to do a series of newspaper stories on the upper portion of the river, he and photographer Jacob Croft Botter were entranced by the river's subtle beauty and the solitude they found there. They came to admire the self-described "river rats" who hunted, fished, and swapped stories along the muddy

water—plain folk who love the Sabine as much as Hill Country vacationers love the clear waters of the Guadalupe. Determined to travel the rest of the river, Ferguson and Botter loaded their gear and launched into the stretch of river that charts the line between the states and ends at the Gulf of Mexico.

A vivid and captivating narrative about how modern science broke free of ancient philosophy, and how theoretical physics is returning to its unscientific roots In the early seventeenth century Galileo broke free from the hold of ancient Platonic and Aristotelian philosophy. He drastically changed the framework through which we

view the natural world when he asserted that we should base our theory of reality on what we can observe rather than pure thought. In the process, he invented what we would come to call science. This set the stage for all the breakthroughs that followed--from Kepler to Newton to Einstein. But in the early twentieth century when quantum physics, with its deeply complex mathematics, entered into the picture, something began to change. Many physicists began looking to the equations first and physical reality second. As we investigate realms further and further from what we can see and what we can test, we must look to elegant, aesthetically pleasing equations

to develop our conception of what reality is. As a result, much of theoretical physics today is something more akin to the philosophy of Plato than the science to which the physicists are heirs. In *The Dream Universe*, Lindley asks what is science when it becomes completely untethered from measurable phenomena?

wrestles with what physics really says about the human condition Not only can we not currently explain the origin of the universe, it is questionable we will ever be able to explain it. The notion that there are universes within particles, or that particles are conscious, is ascientific, as is the hypothesis that our universe is a computer simulation. On the other hand, the idea that the universe itself is conscious is difficult to rule out entirely.

According to Sabine Hossenfelder, it is not a coincidence that quantum entanglement and vacuum energy have become the go-to explanations of alternative healers, or that people believe their deceased grandmother is still

alive because of quantum mechanics. Science and religion have the same roots, and they still tackle some of the same questions: Where do we come from? Where do we go to? How much can we know? The area of science that is closest to answering these questions is physics. Over the last century, physicists have learned a lot about which spiritual ideas are still compatible with the laws of nature. Not always, though, have they stayed on the scientific side of the debate. In this lively, thought-provoking book, Hossenfelder takes on the biggest questions in physics: Does the past still exist? Do particles think? Was the universe made for us? Has physics ruled out free will?

*Page 56/70*

Will we ever have a theory of everything? She lays out how far physicists are on the way to answering these questions, where the current limits are, and what questions might well remain unanswerable forever. Her book offers a no-nonsense yet entertaining take on some of the toughest riddles in existence, and will give the reader a solid grasp on what we know—and what we don't know. all. But everything changes when she finds a body near her home. She's shaken and haunted by the image of the lifeless young woman, and frightened that the killer, still at large, could strike again. Before long, the police have a lead. The evidence points to a very clear suspect. One Gaby never saw coming... Full of brilliant twists and turns, *Under Your Skin* is a dark and suspenseful psychological thriller that will make you second guess everything. Because you can never be too sure about anything, especially when it comes to murder. Betrayal, abduction, reconciliation. Among the stories of Rome's founding is the tale of the women from the

beautiful region of Sabina-stolen, forced to marry the Roman men, and ultimately brokering peace between two nations to become matriarchs of the Roman Empire. The poems of *The Sabine Women* explore this complicated story through the imagined voices of the women, and through examining the works that artists, inspired by this story, have made through the ages.

## The Unbearable Lightness of Being

Blue Sabine is a story of five generations of women in the same family, told in their voices, along with those of some men of Holt blood. It is set along the Sabine River, which divides the state of Texas from Louisiana and the Deep South. From 1867 (when the Holts first came to Texas) to the present, the novel chronicles the emotional lives of grandmothers, mothers, daughters, and nieces, all bound by kinship and history. Each comes to terms with being a woman in the West, in Texas, and in her own way and her own time. In its flow and its setting of boundaries, the Sabine River comes to reflect what remains and what

*Page 60/70*

changes in the way the Holt women see their world and themselves. "The river forever flows, and it pulls at all it touches," one of the characters says, "yet it never leaves, and it never stays." Two twenty-first century descendants give the narrative its overall shape and connection: Clement, an award-winning movie director, and his cousin Kay-Phuong, a woman of Vietnamese and Holt lineage, who has made herself into a fashion model and actress. They have returned to the Valley of the Sabine, where the Holts have lived for almost two hundred years, to hear once more the old stories and to confirm their own part in the saga. They seek to understand and to play their role in

the continuing telling and retelling of the narratives that bind them to their family and to the past.

It is 1972, and fifteen-year-old Sabine enjoys a comfortable life as the daughter of Indian parents living in Uganda. But her world is turned upside down when the country's military President, General Idi Amin, declares Indians must be "weeded out" of the country in ninety days. At first, Sabine does not believe that as Indians born in Uganda they will be forced to leave their beloved home. It all seems so unfair. But as the countdown continues, Sabine's eyes are opened to the poverty and hostility around her. She begins to realize that she has

lived a life of privilege compared to most Ugandans. Even her best friend, Zena, turns away from her. Sabine must use all her strength and resilience to find a way to escape the Uganda that used to be her home.

This book investigates how nongovernmental organizations can become stronger advocates for citizens and better representatives of their interests. Sabine Lang analyzes the choices that NGOs face in their work for policy change between working in institutional settings and practicing public advocacy that incorporates constituents' voices.

Including never-before-seen artwork, a special postcard,

I lived through the Dutroux affair from the inside, and all these years I have kept silent about it - about my 'personal' Dutroux Affair, my time in the company of the most hated psychopath

in Belgium. I need to write this book for three reasons: so that people stop giving me strange looks and treating me like a curiosity; so that no one ever asks me any more questions ever again; and so that the judicial system never again frees a paedophile for 'good behaviour'. 'The Dutroux Affair' shook the whole of Europe. In the middle of the immense machinery of investigation and justice there was Sabine Dardenne herself, Dutroux's last victim. She was held captive for eighty days - and survived. Far from sensationalising the horror, her story, dignified and restrained, is ultimately uplifting. Says Sabine Dardenne, 'I choose to live'.

When *The Unbearable Lightness of Being* was first published in English, it was hailed as "a work of the boldest mastery,

*Page 65/70*

originality, and richness" by critic Elizabeth Hardwick and named one of the best books of 1984 by the New York Times Book Review. It went on to win the Los Angeles Times Book Prize for Fiction and quickly became an international bestseller. Twenty years later, the novel has established itself as a modern classic. To commemorate the anniversary of its first English-language publication, HarperCollins is proud to offer a special hardcover edition. A young woman in love with a man torn between his love for her and his incorrigible womanizing; one of his mistresses and her humbly faithful lover -- these are the two couples whose story is told in this masterful novel. Controlled by day, Tereza's jealousy awakens by night, transformed into ineffably sad death-dreams, while

Tomas, a successful surgeon, alternates loving devotion to the dependent Tereza with the ardent pursuit of other women. Sabina, an independent, free-spirited artist, lives her life as a series of betrayals -- of parents, husband, country, love itself -- whereas her lover, the intellectual Franz, loses all because of his earnest goodness and fidelity. In a world in which lives are shaped by irrevocable choices and by fortuitous events, a world in which everything occurs but once, existence seems to lose its substance, its weight. Hence we feel, says the novelist, "the unbearable lightness of being" -- not only as the consequence of our private acts but also in the public sphere, and the two inevitably intertwine. This magnificent novel encompasses the extremes of comedy and tragedy, and

*Page 67/70*

embraces, it seems, all aspects of human existence. It juxtaposes geographically distant places (Prague, Geneva, Paris, Thailand, the United States, a forlorn Bohemian village); brilliant and playful reflections (on "eternal return," on kitsch, on man and animals -- Tomas and Tereza have a beloved doe named Karenin); and a variety of styles (from the farcical to the elegiac) to take its place as perhaps the major achievement of one of the world's truly great writers.
