Aristotle delineated wisdom into two types. One was the general, god-like, all-knowing wisdom, and the second (more pertinent to us mere mortals) was something called phronesis, or practical wisdom, which is the ability to be discerning about one ' s actions, knowing when and why to act in a pragmatic manner. This book contributes to the history of religions and Buddhist studies fields by focussing on what is a far too frequently ignored aspect of religious experience: visual images.

I also know radiologists who don ' t have plans to retire. They want to keep working, presumably until that desk thing happens. Or until they can ' t get re-credentialed because they can ' t see the computer screen well enough to read all the materials for accreditation. Maybe even until they just can ' t find the right elevator to radiology. Wow.

And it's only in that time that we can see each other, because we see out of ourselves through our cracks and into others through theirs. When did we see each other face-to-face? Not until you saw into my cracks and I saw into yours. Before that we were just looking at ideas of each other, like looking at your window shade but never looking inside.
