Specialist Survey Grade: Cardiologists rated their field a mean 6.8/10 based on various factors of their work. The weighted average of all surveyed specialists was 6.68/10. To the naked eye, cardiology does not look to be a field in need of improvement—more so just one which has already made great improvements.

Cardiologists Seek Equity in the Improvement of their Field

A field has a unique tensorial character in every point where it is defined: i.e. a field cannot be a scalar field somewhere and a vector field somewhere else. For example, the Newtonian gravitational field is a vector field: specifying its value at a point in space-time requires three numbers, the components of the gravitational field vector at that point.

A goal can only be scored either from a field goal, a penalty corner, or from a penalty stroke. A field goal is a goal scored from open play, and can only be scored from inside the 'striking circle', in front of the opponent's goal. If the hockey ball is hit from outside the circle and goes into the goal, it does not count as a goal.
