In geography, a sound is a large sea or ocean inlet, deeper than a bight and wider than a fjord; or a narrow sea or ocean channel between two bodies of land (see also strait). There is little consistency in the use of "sound" in English-language place names

*Sound (geography) - Wikipedia*

Seas System Designs are developed to give everyone the possibility to listen to our drivers in a complete loudspeaker system. In addition to a detailed description of complete systems, we also present crossovers and sketches to boost your own design ideas. Besides using well-known designers like Joseph d'Appolito and Murray Zeligman, our Seas R&D team spends hours listening - not only to our products, but to finished systems they design themselves.

*SEAS DIY KITS - SEAS: The Art Of Sound Perfection*

This includes but is not limited to marginal seas, and this is the definition used for inclusion in this list. The World Ocean. For example, the Law of the Sea states that all of the World Ocean is "sea", and this is also common usage for "the sea". Any large body of water with "Sea" in the name, including lakes.

*List of seas - Wikipedia*

Worst planet in the Universe discovered with raining rocks, 60 mile deep lava seas and winds of more than 3,000 mph. Picture: Reuters. That's probably the worst planet in our Universe... At least one of the most inhospitable new worlds out there with 60 mile deep lava seas, winds of more than 3,000 mph, and where rocks rain from the sky.
