Easy Ways to Adapt Learning Centers for All Children
This powerful, practical resource helps faculty create an inclusive dynamic in their classrooms, so that all students are set up to succeed. Grounded in research and theory (including educational psychology, scholarship of teaching and learning, intergroup dialogue, and social justice theory), this book provides practical solutions to help faculty create an inclusive learning environment in which all students can thrive. Each chapter focuses on palpable ideas and adaptive strategies to use right away when teaching. The first chapter consider professors' intersecting personal and social identities and their expectations for themselves and their students. Chapter 2 considers students' backgrounds, including class, race, disability, and gender, and focuses on what students bring to the classroom, exploring their basic psychological needs of autonomy, competence, and belonging; their approaches to learning; and their self-doubts and uncertainties. Chapter 3 draws on universally-designed learning in combination with educational design rooted in social justice and multiculturalism to describe ways to design spaces in which students flourish academically. Two chapters focus on classroom dynamics. Chapter 4 primarily focuses on preparation for having difficult conversations in the classroom, considering how instructors can create a shared understanding between themselves and their students. Chapter 5 focuses on in-the-moment strategies to both create and manage discomfort about sensitive and controversial topics while supporting students of various social identities (such as gender, race, disability). In the closing chapter, the author integrates all the elements in the preceding chapters, and also presents more general college-wide programs to help faculty develop and improve their teaching.

Teachers must be prepared to create an effective learning environment for both general education students and students with special needs. This can be accomplished by equipping teachers with the proper knowledge and strategies. Preparing Pre-Service Teachers for the Inclusive Classroom discusses the latest approaches, skills, and methodologies on how to support special needs students. Highlighting relevant perspectives on technology implementation, curriculum development, and instructional design, this book is an ideal reference source for pre-service teachers, teacher educators, researchers, professionals, and academics in the education field.

Timely and accessible, this book offers tangible strategies that will help teachers plan and sustain writing workshop experiences that are responsive to the needs of their specific students. Angela Stockman helps teachers understand why some writers may fail to meet their expectations and how to help all writers reach their fullest potential. Organized in three parts, this book reframes common narratives about resistant writers, empowers teachers to design, lead and refine their workshop, and provides a toolkit to do so. The appendices and eResources included provide teachers with instructions for mini-lessons and learning targets that support multimodal composition, perfect for pre-service and in-service teachers.

Written during a period of reexamination and change in the field of special education, this book was developed in order to provide a better understanding of the contexts in which children receive their formal education. The movement toward the "least restrictive environment" for the education of children with disabilities is weathering a wave of reinterpretations including mainstreaming, the regular education initiative, and inclusion. While each interpretation has its proponents and critics, limited theory and few data are available to guide these important policy decisions. Focusing specifically on classrooms -- the settings where educators can have the most immediate impact and where research is most needed -- this volume's goals are: * to establish what is known about classroom ecologies from both general and special education perspectives, * to integrate the perspectives of researchers and practitioners, and * to chart directions for further research specifically related to children with learning disabilities. The construct of classroom ecology is defined as three interrelated domains: instruction, teacher and peer interaction, and organization and management. This scheme provides the structure for the book. Taken as a whole, the content of the volume underscores the limits of current knowledge and at the same time provides directions for needed changes in both research and practice.

Molecular Cell Biology remains the most authoritative and cutting-edge resource available for the cell biology course. The author team, consisting of world-class researchers and teachers, incorporates medically relevant examples where appropriate to help illustrate the connections between cell biology and health and human disease. Emphasis on experimental techniques that drive advances in biomedical sciences and introduce students to cutting edge research teach students the skills they need for their careers.

With increasing emphasis on inclusive classrooms, primary and elementary school teachers can use the information included in Successful Inclusion Strategies for Early Childhood Teachers to build a supportive, caring, learner-driven environment that takes into account the needs of all students. Covering topics from incorporating the needs of students with a variety of special needs to working one-on-one with students to modify classroom experiences, this book offers field-tested strategies for teachers in a concise, friendly format. The authors also provide an overview of how special education law affects inclusive classrooms. The book provides multiple vignettes describing special needs most often found in inclusive classrooms, including autism, ADHD, visual and hearing impairments, and developmental delays, as well as suggested tools and strategies for working with these students. A special section on adapting classroom materials provides teachers with guidance for modifying and differentiating their curriculum to encourage learning in children with special needs. This book is a valuable resource for early childhood teachers, administrators, and childcare directors.

The current emphasis on individualised intervention programmes for students with special needs may not only be impractical, but also undesirable. This book compares and contrasts special needs approaches with school effectiveness strategies. The author sets out theories about inclusive schooling that arise out of a detailed scrutiny of practice. The link between theory and practice will be welcomed by many practitioners. With extensive examples from the field to illustrate Ainscow's ideas, this is an eminently accessible text.

realistic curricular adaptations for ensuring successful inclusion of students with special needs. This highly readable, well researched, and current resource uses a developmental focus, rather than a disability orientation, to discuss typical and atypical child development and curricular adaptations, and encourage the treatment of students as children first, without regard to their learning differences. This integrated but non-categorical approach assumes that children are more alike than different in their development, and avoids the negative impact of labeling children with disability categorical names. The inclusive focus assumes that attitudes, environments, and intervention strategies can be accepted so that all young children with special needs can be included. Combining systematic instruction with naturalistic instruction embedded in daily activities, *Adapting Early Childhood Curricula for Children with Special Needs, 9/e* provides numerous how-to strategies derived from evidence-based practices, making it invaluable as a text today and a resource to take into the classroom tomorrow. Future professionals get examples of practical, realistic curricular adaptations that make inclusive education successful; see how to deal effectively with families and others by developing essential skills in listening, communication, conflict resolution problem solving, and biases and prejudices.
